About this Report
The Access Bank Group 2011 Sustainability Report presents a balanced analysis of our sustainability performance strategy in relation to issues that are relevant and material to the Group and to our Stakeholders. Our last report covered the period from 1 January, 2010 to 31 December, 2010.

This Report is our fourth and sets out our sustainability performance for the financial year January to December 2011. Facts and figures refer to the Group unless indicated otherwise. Financial data is presented in Naira.

This year’s report builds on the achievements of last year’s by providing comprehensive views from our Stakeholders. In addition, we have set out our involvement in the community using the London Benchmarking Group (LBG) model, which enables us to articulate the Bank’s contribution to community development, by measuring cash, in kind and time.

In developing this report, we have also adopted relevant international standards and guidelines such as the AA1000 Assurance Standards and the Global Reporting Initiative (GRI) G3 Sustainability Reporting Guidelines – see www.globalreporting.org.

A GRI context index is provided on page 55 and details of our performance, in line with the GRI financial sector supplement, are available on our website – www.accessbankplc.com/csr.

The Assurance for the Access Bank Group 2011 Sustainability Report was provided by Corporate Citizenship, a leading independent third party assurer of corporate responsibility reports. The assurance process was carried out in accordance with the AA1000 Assurance Standard and through on-site visits and interview sessions with several managers and heads of Strategic Business Units around the Group.
Executive Summary

Our sustainability journey has moved out of the exploratory phase into the leadership phase to a point where we are encouraging the wider African financial industry to ensure societal sustainability.

Creating a successful and sustainable business is of great importance to the Bank and goes beyond financial performance. Our commitment to building a sustainable business is demonstrated through our emphasis not just on what we achieve but on how we achieve it.

As an indigenous African organisation competing locally and globally, we are concerned about our future and about the impact of our business either directly through our own activities or indirectly, through the business activities of our clients. Therefore, we consistently make efforts to ensure sustainability is part of the mainstream of our business operations and decision-making process.

Our 2011 Sustainability Report discloses our sustainability efforts in the year, the areas requiring improvement, and our plans going forward. We are committed to continue meeting the needs of the present without compromising the ability of future generations to meet their own needs.

Corporate philosophy

To this end, the concept of sustainability has influenced our corporate philosophy and is a critical part of our corporate DNA. Our values underpin our strategic approach to sustainability. As a leading financial services provider in Nigeria, Access Bank consistently enhances its ethical standards and balances social, economic, and environmental imperatives in order to address the concerns and expectations of all our Stakeholders.

- **Social benefits** – The Bank actively seeks ways to create positive social change. We therefore create opportunities for people while creating opportunities for our business. Our efforts in this regard include addressing poverty, education, health, human rights, arts and culture. We seek to create long-term economic and social benefits from our projects and presence.

- **Economic benefits** – We appreciate that we are in business to maximise Shareholder value while considering the social and environmental impact of every aspect of our operations. Our contributions to economic development allow us to reduce barriers to development in the communities where we operate and are consistent with the objectives of the United Nations Millennium Development Goals (MDGs). We believe that our economic performance is closely related to our environmental footprints and people values.

- **Environmental benefits** – Protecting the environment is a top priority at Access Bank. We are committed to conducting our business in an environmentally friendly manner. To this end, we have upgraded our environmental and social (E&S) risk management practices to address key environmental and social issues that are specific to the processes and activities of our business.

We are continually advancing on the ‘sustainability journey’. Through increased awareness and compliance, we have reached a higher level of sustainable banking. We understand that big challenges require big solutions, and that no single community, or organisation can do it alone. That is why we continually maximise our influence to drive down costs, increase our accountability, and bring ourselves closer to the customer. Our sustainability journey has moved out of the exploratory phase into the leadership phase to a point where we are encouraging the wider African financial industry to ensure societal sustainability.

We support ongoing reforms and improvement to the financial system and lead by example through continued prudent risk management and capital allocation decision-making while also acting as a strong advocate for tested methods to encourage systemic stability, accountability, transparency and responsibility.

Engaging Stakeholders

In March 2011, Access Bank organised an internal capacity building workshop for staff to increase knowledge of Environmental & Social Risk Management and positively influence the industry by setting the pace for staff training in sustainable banking. In addition, an external workshop for Nigerian financial institutions created awareness of environmental and social issues. This was done in partnership with development finance institutions such as International Development Bank of the Netherlands (FMO), International Finance Corporation (IFC); African Development Bank (AfDB) and Proparco. Continuing these efforts, in September 2011, Access Bank organised an extensive Stakeholder programme entitled The Nigeria Sustainable Finance Week, which brought together key Stakeholders within the local and international community and provided a platform for training, exchange of ideas and progressive partnerships on sustainable finance. This event climaxed with the CEO Roundtable at which the CEOs of banks operating in Nigeria, through the Bankers Committee, established the Strategic Sustainability Working Group (SSWG) with responsibility for drafting the Nigerian Sustainable Banking Principles. The SSWG reports to Access Bank’s Group Managing Director/CEO given his role as the Chairman, sub-committee on Economic Development and Sustainability.

Access Bank serves as the Secretariat for SSWG and, by October 2011, all CEOs of Nigerian banks had signed the joint commitment statement on the Nigerian Sustainable Banking Principles.
Financial inclusion

Sustainability is important to the success of our business and has influenced our strategy as an organisation. It has further enabled the Bank to support global efforts at addressing extreme poverty through the development of products and services aimed at financial inclusion. Given that a large number of people are still either underbanked or unbanked, there is a significantly low level of financial literacy and poor access to information is apparent.

To this end, Access Bank is committed to the goal of establishing series of products and services that encourages savings from the cradle to adulthood. We passionately believe that when it comes to a child’s education, knowing how to manage money is as essential as maths or science.

Recognising this, the Bank’s strategy on financial inclusion led to the launch of Access Bank Early Savers account in 2011. Targeted at children aged 9 years or below, this product provides a solution to financial exclusion by encouraging savings, and promoting financial understanding and literacy.

At Access Bank, we are fully aware that sustainability is transforming the business world in the 21st century. We have therefore further aligned our expertise, talent and business goals with our sustainability agenda in order to achieve greater social, economic and environmental value.

The integration of Intercontinental Bank into Access Bank gives us a much broader platform for demonstrating our commitment to sustainable banking.
Chairman’s Statement

At Access Bank Plc, Sustainability is key to operating our business in a way that helps our customers succeed financially while creating long-term economic growth and a better quality of life for the communities we serve. It’s a vision that guides every decision we make.

Our sustainability agenda therefore has influenced our growth strategy and the way we conduct our business. We grow our business by creating value for our customers, employees, communities and strengthening the financial system.

It is an honour to lead Access Bank into a future that builds upon a tradition of doing business in a safe, environmentally sound and socially responsible manner. These are really exciting times for me, the investors, the customers, employees and other Access Bank Stakeholders. The merger with Intercontinental Bank has positioned us among the Big 4 financial institutions in Nigeria. With a combined turnover of N138,949,414,000, 7,051 employees, 310 branches and serving an estimated 5 million customers, we are a significant business by any standard.

Sustainability in the mainstream
Sustainability is at the heart of this growth and has a significant influence on the review of the Bank’s corporate philosophy. With that in mind, I am delighted to say that this report shows how the Bank is making steady progress with regard to social, economic and environmental responsibilities. The continuing process of making sustainability a mainstream component of our business has also positively impacted the financial sector, by supporting industry growth.

Since our last report, we have continued to strengthen our sustainability initiatives through dedicated efforts, innovative programmes and leadership in business practice and community investment.

Highlights from 2011 include:

- **Staff workshops:** To ensure seamless mainstreaming of sustainability into our organisation, we conducted a series of capacity building workshops for staff. The first in the series was for all staff in the Group office, followed by another for employees at the Bank’s banking subsidiaries. In 2011, the Bank’s Environmental and Social Risk Management training focused on teaching selected staff about the dynamics of the Equator Principles as well as Environmental & Social (E&S) risks. It also showed them how to use the Bank’s finance toolkits when screening lending projects.

- **Financial sector workshops:** To transfer this work into the community, we partnered development finance institutions in a workshop that enhanced awareness among the Nigerian financial sector about the importance of incorporating environmental and social considerations into their investment and risk management decision-making.

- **Nigeria Sustainable Finance Week:** Initiated by Access Bank, this event led to the signing of a Joint Commitment Statement on Nigeria Sustainable Banking Principles by the CEOs of Nigerian banks. This effort, supported by the Central Bank of Nigeria (CBN) and other regulators, has prioritised sustainability in the agenda of the Nigerian financial sector. The fact that this and all the other pioneering work detailed in this report has been recognised through a number of awards – most notably, the FT/IFC Sustainable Bank of the Year Award (Africa and Middle East), BITC Big Tick Award, World Finance ESG Award, and Ecofest Environmental Award – may come as the icing on the cake for the many employees whose efforts contribute to our sustainability programme.

Values and principles
But this work is about more than just awards. It’s about ensuring that we are responding to Stakeholder concerns about our key social and environmental impacts, it’s about ensuring the Bank’s values and principles continually underpin our business activities, and it’s about moving further towards the ultimate goal of sustainable development.

Celebrating achievements, sharing best practices and acknowledging shortcomings is important for our business. We welcome you to our 2011 Sustainability Report and we look forward to your candid feedback.

Gbenga Oyebode, MFR
Chairman, Access Bank Plc
Chief Executive’s Statement

At Access Bank, we are poised to positively impact societies through the jobs we create, the revenues we generate, the impact of our social investments and the way we engage and work with various Stakeholders.

The year under review was one of growth for the Bank and our continued emphasis has been on sustainable banking, which underpins our growth strategy. We therefore drive our operational and economic performance in a way that values our customers and our employees, upholds the financial system, and delivers long-term benefits to our host communities. Strategically, the merger with Intercontinental Bank supports this growth strategy by providing the profile, size, market share and reach to attain Access Bank’s objectives and ambitions.

Economic growth
Our growth strategy recognises the powerful economic growth that is happening in Nigeria and across Africa despite the inclement conditions in the advanced economies. And we remain convinced that these economies will continue to seek improved access to financial and infrastructural development across a number of sectors in Africa for a long time to come. This is the opportunity we see and the responsibility we embrace in our bid to help millions of Africans unleash their potential.

We have developed an ambitious strategy and implementation plan for the year ahead. We will continue to develop and take to market innovative products to reach more of the previously unbanked and open capital flows where our infrastructure development priorities need it most.

As sustainability continues to rise in importance as a critical global business agenda, Access Bank is committed to the continued mainstreaming of sustainability into our business. We envision an organisation that will be here decades from now. Sustainability is what drives us. It is our commitment to customers as well as our employees. It is the responsibility we have to the communities we live in and the planet we live on.

Leading financial institutions such as ours recognise sustainable development as a source of investment value. During the year under review, Access Bank has continued to underline the importance of its corporate social responsibility agenda as one of its main principles. As part of the Bank’s determination to support initiatives that will engender a sustainable economy and promote a greener environment, Access Bank in 2011 convened the first ever Nigeria Sustainable Finance Week under the theme Moving Frontiers – Sustainable Finance. This initiative was in collaboration with the United Nations Environment Programme Finance Initiative (UNEP FI) and FMO, with the aim of educating Stakeholders in the Nigerian financial sector about opportunities in sustainable finance. The first of its kind in Africa, the event was a major milestone for the Nigerian banking sector. Access Bank in this regard led other Nigerian Banks in recording a major feat of its main principles. As part of the Bank’s determination to support in the Arts and in Education, Environment, Health and Global stewardship, and national foresight, Access Bank regularly partners with organisations to mobilise strategic financial support in the Arts and in Education, Environment, Health and Sports. To take just one example, the Nigerian NGO Idea Builders Initiative is our partner in our Going Green; Beyond Words tree-planting project. We have also partnered with Friends of Africa to support the fight against AIDS, TB and malaria through education, multi-sectoral advocacy and documentation.

Global stewardship
We are taking action across all our business operations to improve our global stewardship. We are focused on the areas where we have the most impact, including governance and ethics, customer relationships, employee standards, environmental performance and sustainable products and services. We are committed to using innovation and sensible environmental steps to grow our business and minimise our impact on the environment.

This report sets out what sustainability means to Access Bank in more detail and looks at some of the work we are doing, ranging from the way we do business with our customers, to the work we do to help communities prosper. While I am proud of our achievements to date, I believe that our greatest victories are still ahead of us. We know that it is going to take a lot of work from a lot of extremely dedicated people to make the changes our world needs to make, but we look forward to being a part of this change. We hope to use our experience and resources to make a better world for the future, and to experience the satisfaction of bringing this about.

As a driver of economic growth, we understand the role that the financial sector plays in modern society and development.

Aigboje Aig-Imoukhuede
Group Managing Director/Chief Executive Officer, Access Bank Plc

Access Bank Plc
Corporate Social Responsibility Report 2011

05
Access Bank Plc is a full service commercial bank with headquarters in Nigeria and operations across Sub-Saharan Africa – spanning the region’s 3 monetary zones – and the United Kingdom.

The Bank was incorporated in February 1989 as a privately owned financial institution and commenced banking operations in May 1989. It was subsequently listed on the Nigerian Stock Exchange in 1998. The Bank’s Over the Counter (OTC) Global Depository Receipts (GDRs) are traded on the London Stock Exchange.

**Comprehensive services**

The Bank is licensed to carry out international banking services and provides a comprehensive range of financial services. The key business segments of the Bank are: Institutional Banking, Commercial and Consumer Banking, Investment Banking and Private Banking. The key customer segments include: Telecommunications, Beverages, Manufacturing, Construction, Oil & Gas, Parastatals, High Net Worth Individuals and Middle Income Professionals.

We take pride in our ability to add value to clients, leveraging our unique value proposition to provide innovative and proactive solutions across entire economic value chains. In deploying products and services, the Bank adheres to responsible business practices and readily commits resources to social investments in fulfilment of its corporate social responsibility convictions. For more about sustainable business practices visit www.accessbankplc.com.

We have a diversified Shareholder base comprising local and international institutional and individual investors. The Bank has more than 500,000 Shareholders. The Bank’s Shareholders’ fund is in excess of US$1.2 billion and its strategic intent is to rank among the top 3 Nigerian banks by 2012 and also to become a major catalyst for growth across the African continent.
Best practice
The Bank continues to institutionalise best practices to provide Stakeholders with superior assurance regarding the quality of its current corporate governance structures and functions. The Bank demonstrates exemplary performance in its financial and non-financial disclosures. Its strengths include a highly diverse board membership; competent, dynamic and responsible management; strong economic value and good ethical practices and transparent processes.

As a result of its professionalism and high level adherence to global best practices, the Bank is a preferred choice of international partners and multilateral agencies seeking to do business in Nigeria and Africa. The list of international organisations that are in partnership with Access Bank Plc include (but are not limited to) respectable organisations such as the Netherlands Development Finance Company (FMO), the International Finance Corporation (IFC), Visa International, US EXIM and China EXIM Bank.

The understanding and commitment of the Bank’s employees, over 500,000 Shareholders, millions of customers and several partners across the world have been critical to Access Bank’s progress and success.

Primary brands, products and services
Access Bank offers a full range of product options for individuals and institutions through a comprehensive portfolio of financial and non-financial services.

Personal accounts
We offer a total value package, with customised services designed to suit individual requirements. Our products and services are tailored to make everyday banking easier. We offer the following account types:

Access Early Savers account
Early Savers teaches children about saving and gets parents/guardians thinking about their children’s financial future.

Standard Current account
The Standard Current account is a checking account designed for the discerning customer. The account gives the flexibility of managing day to day financial affairs.

Call Deposit account
The Access Bank Call account allows customers to save funds while maintaining liquidity and earning interest.

Standard Savings account
The Standard Savings account helps to save towards future financial security. Aiming to encourage a savings culture, it is easy and convenient to operate.

Access Premier account
Access Premier account is a high-yield current account for individuals, with investment benefits designed to meet their financial needs.

Solo account
This account provides the opportunity for students and young people between the ages 10 and 15 to access world-class financial services.

**Our Business at a Glance continued**

**Access Advantage account**
Access Advantage is a savings account that gives the benefits of a current account.

**Wealth Management**
Access Bank Wealth Management Group specialises in providing clients with integrated wealth management products and services. These include the principal areas of advisory, investment, banking and risk.

We create and develop structured products tailored to suit a customer’s needs and help meet personal financial aspirations. This service includes traditional banking, innovative investments and financial planning. Access Bank Wealth Management offers this full range of financial products and services not only in what are termed traditional asset classes such as cash management and tenured deposits, but also a broad spectrum of investment opportunities and personalised offerings such as portfolio management, concierge and custodian services.

Our role is to create, track, preserve and enhance wealth. To accomplish this, we have built a global network of relationships, expertise and competence.

**Core operations**
The Bank’s core operations comprise Institutional Banking, Commercial Banking, Financial Markets, Retail Banking and Transaction Services.

**Institutional Banking**
This division is responsible for developing the Bank’s relationships with tier 1 private sector businesses, essentially comprising large multinationals and local corporations.

The division is structured in a manner that reflects key sectors of the economy – Oil & Gas, Telecommunications, Food & Beverage, Cement, Metal Fabrication, Transportation and Household Utilities. We deploy highly qualified sector specialists to serve these corporations operating in these sectors.

**Commercial Banking**
The Commercial Banking Division serves three distinct market segments: Commercial Banking, the public sector and wealth management. Our Commercial Banking customers include organisations with turnover of between N500 million and N13 billion, as well as any other structured and unstructured businesses that are not serviced by our Investment Banking Division. Within our commercial banking segment, we maintain a special emphasis on SMEs. Public sector clients consist of federal ministries, departments and agencies, and other state and local government entities.

**Financial Markets**
The Financial Markets Division provides specialised financing and investment solutions, including trading in fixed income and currencies. We conduct these activities through the Treasury Group, the Corporate Finance Group and the Financial Institutions Group.

**Retail Banking**
We currently serve over 1.5 million customer accounts. We provide a range of financial products and services to customers, employees and major Shareholders of corporations, small businesses (including churches, schools and hotels) and government institutions.

**Transaction Services**
This division provides a clear example of how the Bank overall is broadening its network and customer base and engaging different categories of customer.

By the end of 2011, there was a fourfold increase in the number of the Bank’s branch locations, and a sevenfold increase in the number of customers served by the Bank compared to 2010. The engagement model developed prior to the merger with Intercontinental Bank provides tailored services to the institutional and public sector, corporate and large customers, and high net worth and private banking clients. Staying with the same model has ensured a quicker transmission of the division’s ethos: Passion for Customers. Through this, we can contribute to delivering the Access Bank promise of world-class service through exciting customer experiences.

**Core services**
The Bank also benefits from a range of sophisticated back-office operations that provide a firm foundation for our business. These operations include IT Services and Settlement Banking.

**IT Services**
Access Bank continues to build on its robust Information Technology (IT) platforms that enable it to provide effective support for the Access Bank Group’s strategy for business growth and sustainability.

In 2011, more industry benchmark automation projects were successfully implemented to achieve business optimisation and deliver competitive advantage for our business. Our strategic approach has continued to consider the environmental impacts of technology. We have focused on self service for our corporate and retail customers, reducing the need to travel to transact business or execute personal transactions. To bring about operational efficiency, we have invested in the propagation of high speed networks across our branches and technologies that enable Straight Through Processing from the front-end customer transaction to final settlement of transactions.

We have invested in the delivery of comprehensive world-class database technology that facilitates analytical processing. This delivers enhanced business and customer intelligence, enabling better insights into operational efficiency and customer behaviour. Our state-of-the-art Customer Relationship Management platforms allow us to manage customer relationships in a highly efficient manner.

**Settlement Banking**
As a settlement bank, Access Bank continues to play an active role in collaboration with the Central Bank of Nigeria (CBN) in all its initiatives towards reforming the National Payments System. The Bank was an active participant in the pilot run of the Electronic Cheque Presentment and Image Exchange (ECPIX) initiative. This is in preparation for the implementation of cheque truncation in the Nigerian financial settlement system led by Nigeria Inter-Bank Settlement System (NIBSS).

Similarly, the Bank continues to pursue every effort to enhance interoperability of systems and payment/settlement devices to benefit all Stakeholders in the business value chain.

We are also making major investments in transaction settlement infrastructure, and seeking collaboration with partners to develop platforms offering scale efficiency, cost optimisation and better service delivery capabilities.

Access Bank Plc
Corporate Social Responsibility Report 2011
## Our Approach to Sustainability

### Vision: To be the most respected Bank in Africa

- **Our core values**
  - **Excellence**: Surpassing ordinary standards to be the best in all that we do  
  - Setting the standard for what it means to be exceptional  
  - Never losing sight of our commitment to excellence, even when the going gets tough  
  - Remembering that excellence requires dedication and commitment  
  - Our approach is not that of excellence at all cost – it is excellence on all fronts so that we deliver outcomes that are economically, environmentally and socially responsible

- **Leadership**: Leading by example, leading with guts  
  - Being first, being the best, sometimes being the only  
  - Courage to be the change we want to see  
  - Setting the standard  
  - Challenging the status quo  
  - Market making  
  - Self-awareness in being able to maintain a balanced assessment of externalities and costs incurred in the pursuit of leadership

- **Passion for customers**: We live to serve our customers  
  - In addition to delivering excellent customer service, we will be focusing on:  
    - Economic empowerment: enabling people to achieve more through provision of finance, lifting people up throughout the value chain  
    - Financial education: helping people clearly understand how our products and services work  
    - Financial inclusion: providing finance to those individuals and communities that traditionally have limited or no access to finance  
    - Treating customers fairly: building long-term relationships based on trust, fairness and transparency

- **Empowered employees**: Recruiting and retaining the right people and teams based on shared values and vision  
  - Developing our people to become world-class professionals  
  - Encouraging a sense of ownership at individual level whilst fostering team spirit and loyalty to a shared vision  
  - Promoting a sense of belonging and community  
  - Facilitating continuous learning by providing the training, tools and coaching to help our people grow  
  - Helping them take care of their health  
  - Pursuing a positive work/life balance for increased productivity and improved employee satisfaction  
  - Encouraging a diverse workforce; respect for & appreciation of differences in ethnicity, gender, age, national origin, disability, and religion

- **Professionalism**: Putting our best foot forward in everything we do, especially in high pressure situations  
  - Consistently bringing the best of our knowledge and expertise to the table in all of our interactions with our Stakeholders  
  - Setting the highest standards in our work ethic, behaviours and activities in the way we treat our customers and – just as importantly – each other  
  - Putting our customers’ needs ahead of our own  
  - Maintaining composure and clear thinking at all times  
  - Ensuring continuous learning; through continuous growth and career development

- **Innovation**: Identifying new market needs and opportunities  
  - Creativity, invention, inspiration, exploration  
  - Pioneering new ways of doing things, new products and services, new approaches to clients/customers  
  - Being first, testing the waters, pushing boundaries  
  - Going from concept to market/reality  
  - Anticipating and responding quickly to market needs with the right technology, products and services to achieve customer objectives
Overview

Mission: Setting standards for sustainable business practices that; unleash the talents of our employees, deliver superior value to our customers and provide innovative solutions for the markets and communities we serve.

Awards and recognition in 2011

</table>

Management focus

Sustainability is another key to how we advance our business objectives, implement our policies, apply our social investment and exercise our influence to make a productive contribution to society. We recognise we are in business to maximise Shareholder value while minimising the negative social and environmental impact of every aspect of our operations. There is therefore high-level management focus on sustainability and the Bank’s strategy is to mainstream sustainability into its banking operations for a sustainable future and the long-term success of its business.

The Board of Directors, through an established CSR/Sustainability Committee, provides the highest level of governance oversight for sustainability management. The CSR/Sustainability Committee is responsible for overseeing the delivery of the Bank’s sustainable business strategy, to ensure that the Bank’s sustainability ambitions in each of its strategic priorities are achieved.

Mainstreaming sustainability

The Bank has also adopted global best practice principles, frameworks and standards, to support the effective mainstreaming of sustainability in the Bank. We are therefore an Equator Principles Financial Institution, an Organisational Stakeholder (OS) of the Global Reporting Initiative, and a member of the United Nations Global Compact (UNGC), United Nations’ Principles for Responsible Investment (UNPRI), the United Nations Environment Programme Finance Initiative (UNEP FI) and the Clinton Global Initiative.
At Access Bank, we are committed to our sustainability agenda and are making efforts at mainstreaming sustainability into all of our business processes. This involves finding ways to impact a variety of critical issues and themes: economic development and advocacy; employee and partner relations; fair treatment of customers; the environment; gender; finance for small- and medium enterprises (SMEs); the arts; education; the environment; and sports.

**Ideas and resources**
Access Bank is committed to deploying 1% of its annual profits in support of corporate social responsibility. We actively seek to encourage employees to contribute ideas, skills and resources for societal development, through our employee volunteering scheme.

All companies within our Group, as responsible corporate citizens, subscribe to the same high level of standards as the parent company, and work with others to develop, implement or contribute to health, educational, environmental and cultural programs focused on their local communities’ needs and aspirations.

**Sustainability risks, impact and opportunities**
At Access Bank, we make disclosures to communicate our sustainability activities in order to enhance public understanding and opinions. Our coordinated approach to these disclosures aligns with international best practice. The most significant of the Bank’s sustainability-related risks and opportunities relate to our operations, external environment, and relationships.

Sustainability opportunities are identified, prioritised and managed through growth of the business and the implementation of sustainability solutions at business unit level, as well as the Bank’s participation in sustainability and environmental forums. We also consider issues raised by our key Stakeholders and international benchmarks for sustainability performance.

Access Bank also has risk management processes in place to enhance its existing processes by integrating sustainability within them. We have taken steps to ensure that our risk management systems cover the legal, regulatory and reputational risks associated with direct and indirect environmental and social impacts. These risk reporting systems have been informed by the Environmental, Social and Governance (ESG) framework. ESG describes the main areas of concern that have developed as the central factors in measuring the Bank’s sustainability and ethical impact.

**Customer satisfaction**
Access Bank recognises that marketplace perceptions and reactions to business behaviour and practices are critical to corporate success. We engage in responsible customer relations, including marketing and advertising; and ethical competition. We treat our customers fairly, with openness and transparency, and ensure that our marketing practices enable us to focus on building and maintaining sustainable, long-term relationships with our customers.

**Environmental performance**
Access Bank is committed to conducting its business in a manner that protects the environment, wherever we operate. We integrate environmental elements into our business plans and strategies, and address key environmental issues that are specific to the processes and activities of our business.

**Economic development**
Access Bank seeks to create long-term economic and social benefits from its projects and presence. We employ a variety of economic support and incentive programs, including employee development and strategic community investments. Our contributions to economic development allow us to reduce barriers to development in the communities in which we operate and are consistent with the objectives of the United Nations Millennium Development Goals (MDGs).

Access Bank has taken steps to ensure that risk management systems cover the legal, regulatory and reputational risks associated with direct and indirect environmental and social impacts. These risk reporting systems have been informed by the Environmental, Social, and Governance (ESG) framework and Board level oversight is provided by the Bank’s Operational Risk Management Committee (ORMC). ESG risks are addressed by a policy guideline which addresses environmental and social risk issues in credit and lending. This forms part of a Group-wide framework for addressing the Equator Principles (EP), and provides for internal monitoring and management of ESG performance.

**Sustainability opportunities**
Sustainability opportunities are identified through growth of the business and the implementation of sustainability solutions at business unit level, as well as the Bank’s participation in sustainability and environmental forums. These forums provide a platform to pursue sustainability opportunities and, where necessary, incubate new projects until they mature enough to be fully integrated into the operations of the business unit concerned.

**Prioritising risks and opportunities**
Risks and opportunities are prioritised, taking business performance implications and stakeholder materiality into consideration. The Bank defines materiality according to the GRI (G3) guidelines definition and with reference to both internal and external factors. Current sustainability priorities include investing in employee development and retention, maintaining progressive business client relationships, managing our environmental footprint, and implementing environmental and social (E&S) risk management processes, while supporting other financial institutions in Nigeria through E&S risk management capacity-building programmes.

Access Bank has begun to integrate environmental and social (E&S) risk management considerations into its business operations. This takes all significant E&S issues into consideration while ensuring that our business operations do not degrade the environment or cause social harm. Through this activity, the Bank achieved the following:

- Developed specific E&S policies for sectors such as Oil & Gas and Cement which have the greatest impacts on E&S risks;
- Reviewed and aligned E&S policy and procedures with international best practice standards; and
- Developed a risk management toolkit that will assist the Bank in screening projects to identify potential E&S risks; determine appropriate level of E&S due diligence required for projects and integrate E&S policy into existing credit processes.
### Recent sustainability milestones

**Overview**

<table>
<thead>
<tr>
<th>Year</th>
<th>Evidence in bank activity</th>
</tr>
</thead>
</table>
| 2007 | • September – the Bank becomes a member of the GBCHealth, formerly Global Business Coalition on HIV/AIDS, TB and malaria.  
• October – joins the Nigeria Business Coalition Against AIDS (NIBUCAA) in line with the Bank’s commitment to support the Nigerian corporate response to the issues of HIV/AIDS.  
• December – unites with the global community to celebrate World AIDS Day on 1 December, 2007. |
| 2008 | • January – the first Access Bank Corporate Social Responsibility Strategy is approved by the Bank’s Board of Directors.  
• February – Access Bank launches its Workplace Policy and Programmes on HIV/AIDS.  
• May – the Bank trains 300 peer educators to act as crusaders for HIV/AIDS preventive practices and to provide support for infected staff members.  
• June – becomes a pioneering member of Business in the Community (BITC).  
• September – Access Bank receives Nigeria’s Most Improved Company in CSR award from Social Enterprise and Report Awards (SERA).  
• October – Access Bank is nominated for the FT/IFC Africa/Middle East Emerging Markets Sustainable Bank of the Year Award. |
| 2009 | • March – becomes the first Nigerian financial institution to sign-on to the London Benchmarking Group (LBG). This provides a comprehensive and consistent parameter to capture the output and longer-term impacts of the Bank’s Community Investment projects on business and society.  
• April – the Bank joins the Global Reporting Initiative (GRI) and uses GRI guidelines to produce its CSR/Sustainability Report.  
• June – start of the Going Green: Beyond Words Tree Planting Initiative. Through this project, Access Bank has so far been able to educate 800 students from 40 secondary schools across Nigeria on climate change causes, effects and solutions. The scheme has inspired students to reduce CO₂ emissions within schools, and in their local communities, and resulted in the planting of 4,800 trees.  
• June – the Bank becomes the first Nigerian financial institution to become a signatory to the Equator Principles (EP).  
• October – launch of Mirror the Master Initiative, celebrating the works of established art masters. The initiative has helped to showcase 500 new talented artists in Nigeria. For example, Onyek Johncross, from Model Primary School, Nsukka was a winner in the first phase of this scheme and currently has 2 of his paintings in the British Royal Collection. |
| 2010 | • January – the Bank commences the strategic integration of Environmental and Social (E&S) considerations into the Bank’s business operations.  
• March – concludes the first phase of its SME Workplace Policy Programme training. Through this project, Access Bank has so far been able to enhance the capacity of 250 SMEs to develop Workplace Policy on HIV/AIDS, TB and malaria and scale up on health programmes.  
• September – contributes US$1 million to the Global Fund Gift from Africa Project. This remains the single largest donation by an African private sector corporation to combat HIV/AIDS, TB and malaria.  
• October – Access Bank named Most Socially Responsible Bank by African Banker magazine.  
• December – through the Bank’s Employee Volunteering Programme, Access Bank staff pass the milestone of having impacted 21,000 lives. This figure includes about 15,000 students in educational institutions, 100 orphans and vulnerable children affected by HIV/AIDS, 1,500 secondary school students receiving education about HIV/AIDS, 4,000 hospital patients, 2,000 community members gaining access to portable water and about 3,500 orphans, elderly, prison inmates and motherless children. |
| 2011 | • March – Access Bank leads the adoption of the Environmental and Social Risk Management Framework through a pioneering workshop for financial institutions operating in Nigeria in partnership with FMO, IFC, African Development Bank and Proparco.  
• March – the Bank becomes the first financial institution in Nigeria to deploy a customised Sustainable Finance toolkit that will assist in screening projects to identify potential E&S risks. The kit will also determine the appropriate level of E&S due diligence required for projects and integrate E&S policy into the Bank’s existing credit processes. The Bank also signed the CEO Statement in support of the UNGC/UN Women’s Empowerment Principles.  
• March – Aigboje Aig-Imoukhuede and Herbert Wigwe win the Young Global Champions category in the THISDAY Awards for banking transformation across Africa and beyond.  
• April – Access Bank was awarded a Big Tick in the Business in the Community (BITC) Awards for Excellence 2011. For companies who have a significant impact in making responsible business an integral part of what they do, this national award is one the most recognised endorsements of responsible practice.  
• May – Access Bank was recognised by GBChed for reaching the final stage of the Business Action on Health Award.  
• June – Access Bank was named Sustainable Bank of the Year (Middle East and Africa) in the 2011 FT/IFC Sustainable Banking Awards.  
• July – Access Bank won the Lagos State CSR Gold Award for its good corporate citizenship.  
• September – Access Bank initiates the pioneering Nigeria Sustainable Finance Week which concludes with a CEO Roundtable. At the Roundtable, the Strategic Sustainability Working Group (SSWG) is constituted, with Access Bank as the Secretariat.  
• October – Access Bank, alongside other members of the Bankers Committee, signs a joint statement on Nigeria Sustainable Banking Principles.  
• October – Access Bank wins the World Finance ESG Award as the 2011 Best ESG Asset Manager, Nigeria, for integrating ESGs into its business operations.  
• November – the Bank trains 2,000 SMEs across Nigeria, Ghana, Rwanda and Zambia. This enhances the capacity of the SMEs to develop Workplace Policy on HIV/AIDS, TB and malaria and scale up on health programmes.  
• December – the Bank’s Board of Directors approve the revision of the Bank’s corporate philosophy in line with our sustainability agenda. |
Corporate governance structure and procedure
The Bank’s approach to corporate governance is responsive to the changing regulatory environment. Our governance and ethical behaviour form the baseline of our business practice. This ensures that we tie Sustainability directly to the Bank’s Senior Management and Board of Directors, who bear responsibility for overall business strategy, practices and policies.

Our governance structure determines the fundamental relationships among the members of the Board of Directors, Management and other Stakeholders. It defines the framework through which ethical values are established and the context in which corporate strategies and objectives are set.

The strength of our governance starts at the top with a Non-Executive Chairman and 7 well-informed Non-Executive Directors that give priority to strategic planning; ensure that standards exist to promote ethical behaviour throughout the organisation; and drive continuous improvement in governance practices.

Corporate governance at the Bank is the principal responsibility of the Directors led by the Chairman of the Board, while management of the Bank is the responsibility of the four Executive Directors led by the Group Managing Director/CEO. The Board of Directors at all times complies with the Central Bank of Nigeria (CBN) Code of Corporate Governance.

Board composition, selection and tenure of Directors
• Directors that are currently employed by the Bank are deemed Executive and all others are deemed Non-Executive;
• Non-Executive Directors will always constitute at least a majority of the Board;
• An Executive Director that has substantial stock in the Company upon retirement may elect to serve on the Board of Directors as a Non-Executive Director. In all other cases, an Executive Director shall submit his or her resignation from the Board upon termination of active service as an employee;
• A Director will retire from the Board at the next Annual General Meeting of the Shareholders following the attainment of age 70; and
• A Director will also vacate office or cease to be a Director, if the Director directly or indirectly takes a facility from the Bank that remains non-performing for a period of more than 12 months.

Mechanism for making recommendations to highest governance body
Shareholders and other Stakeholders communicate with the Board at the Investors Forum and Annual General Meetings, which are held yearly and where Stakeholders are free to raise any issue of concern. The Bank also has an Investor Relations Unit which is an accessible channel for Shareholders to register their views, which are communicated to the Board.

Through the annual employee survey report, the Board is informed of staff opinions. Also, employees express their views through various channels including one-on-one discussions, focus group discussions, feedback via emails, among others.

Conflicts of interest
The Bank’s business requires that special obligations be imposed on all employees to safeguard its integrity, operations and interests.

Employees are expressly prohibited from using their association with the organisation for personal gains beyond authorised compensation and benefits. Whenever there is any question of whether an activity would violate or appear to violate this principle, guidance must be sought from appropriate management authority. Clarification must be sought on all issues which border on conflict of interest;
• Employees must not, on their own behalf, borrow from or lend to customers of Access Bank Plc;
• Employees must not use the Bank’s name and influence for personal purposes;
• Employees must not do anything to undermine either another employee, or the affairs of the Bank;
• Employees must adhere to the Bank’s principles and policies, and must remain completely free of conflicting interests or activities which interfere with proper performance of their duties to the Bank; and
• Employees must conduct themselves in a manner that brings credit to the Bank.

The Bank has also created polices and standards to eliminate issues relating to conflicts of interest. Policies include:
• Code of Conduct: Access Bank employees are governed by an Employee Code of Conduct. The Code contains extensive provisions on the following areas: compliance with laws, rules and regulations; confidential customer information; confidential bank property; conflict of interest; gifts from customers; loans to or from customers; use of account by third parties; use of the Bank’s name; cooperation with regulatory bodies; and public statement. Contained in this Code is the conflict of interest policy. This policy ensures that all employees avoid any situation that poses a conflict, or the appearance of a conflict, between their personal interests and the performance of their official duties.
• The Code is regularly reviewed and updated as required, to ensure it covers all aspects of our activities and is clear and easy for our employees to understand and follow. Employees are encouraged to familiarise themselves with the Code of Conduct and ensure strict adherence to its provisions.
• Directors’ Regulatory Reporting Framework: This guides the reporting of Directors’ interest in contracts, Directors’ interest in facilities, the reporting of share dealings by Directors, among others.
• Determining qualifications and expertise of the highest governance body: Members of the Board are appointed taking into account the following criteria demonstrated outstanding achievement in the prospective Board member’s personal career:
  − Breadth of experience;
  − Soundness of judgement;
  − Ability to make independent, analytical inquiries;
  − Ability to contribute to a diversity of viewpoints among Board members; and
  − Willingness and ability to devote the time required to perform Board activities adequately.
Evaluating Board performance
Annual Board performance evaluations are conducted internally and externally by consultants. Internally, the collective performance of the Board is evaluated by all Board members using evaluation criteria approved by the Board. This is done at least annually. Externally, Board performance evaluation is conducted by consultants. For the reporting period, the evaluation of the Board was conducted by Accenture.

Sustainability governance
The Bank’s Group Sustainability Committee was established in 2009 to oversee and align our approach to the range of social and environmental issues and opportunities which confront our business on a daily basis.

The Committee meets quarterly and is chaired by the Group Managing Director. All key business areas are represented on the Committee, which benefits from the skills of an independent expert, Dr Christopher Kolade, the Chairman of the Convention of Business Integrity (CBI).

Dr Kolade provides leadership support, guidance and an independent opinion on the Bank’s sustainability performance, to enable the Bank to benefit from global best practice.

The Bank’s Group Sustainability Committee is responsible for setting guidance and direction, and for overseeing policies and progress on the Company’s Corporate Social Responsibility and related activities. The Committee also offers advice to the Board on these matters. The Group CSR Team provides central support to the Committee in order to facilitate this.

The Bank also has a series of other committees and steering groups that oversee our governance approach to sustainability. They review emerging and current issues, risks as well as opportunities, make recommendations to the Board and are actively involved in the integration and implementation of the Bank’s sustainability initiatives.

To ensure that the agreed sustainability agenda is put into practice, the CSR Team works with a network of Strategic Business Units Heads and CSR Champions in our various countries of operation.

Across the Bank, we have a number of complementary systems and policies in place to assess and mitigate a range of reputational and sustainability risks. Further detail is provided in this report.

Regulation, legislation and public policy
The Bank ensures that its policies, procedures and practices are in sync with public policy. In addition, the Bank is actively engaged in influencing public policy formulation via several reform advocacy initiatives it has embarked upon or supported.

Commitments to external initiatives
The Bank remains fully committed and engaged via our core initiatives to ensure the long-term sustainability of our business. We continue to take many opportunities to work with partners on a range of sustainability issues.

The Bank remains fully committed and engaged via our core initiatives to ensure the long-term sustainability of our business

Right: The CEO Roundtable

Above: Herbert Wigwe, Deputy Group Managing Director, Access Bank Plc at the CEO Roundtable

Nigeria Sustainable Finance Week
In March 2011, the Bank organised an internal capacity building workshop for staff to build capacity on E&S Management. In addition to this, an external workshop was organised for Nigerian Financial Institutions to create awareness on environmental and social issues.
As a follow up to this, the Bank sponsored an enlarged Stakeholder programme entitled Nigeria Sustainable Finance Week with the theme “Moving Frontiers – Sustainable Finances” was organised in September 2011 in partnership with United Nations Environment Programme Financial Institutions (UNEP FI), the Dutch Development Bank (FMO), the International Finance Corporation (IFC), the African Carbon Asset Development Facility (ACAD), the Nigerian Conservation Foundation (NCF), the Chartered Institute of Bankers of Nigeria (CIBN), DEG, Proparco and AfDB. Attended by more than 200 delegates, this event provided a forum for the exchange of ideas and information among sustainability NGOs, corporate organisations and leading financial professionals from around the world. It also presented a platform to address the challenges around E&S integration and provided a forum for the exchange of ideas and information.

The following workshops were held during the Nigeria Sustainable Finance Week:

Plenary Session 1– Financing the Green Economy
Keynote address: Financing the Green Economy
This session highlighted how sustainable finance is at a tipping point. It also underlined the importance of banking to Green Economy. It also highlighted how the energy sector is gaining ground in the Nigerian energy sector. Understanding the potential of renewable energy requires the discussion of both the barriers and drivers of this sector as well as the ways the financial sector can gain from this developing industry. It also requires understanding how public-private partnership can leverage private financial flows. Questions discussed included:

- What is the role of the traditional energy suppliers in the transition to a low-carbon energy sector?
- What barriers and drivers do private financiers currently see in investing in low-carbon/renewable energy?
- How can the resources of governments and multilateral financial institutions leverage financial flows from banks, insurers and investors into the low-carbon energy supply?

Plenary panel: Why sustainable agriculture?
This session looked at the importance of agriculture to the Nigerian economy and the growth of sustainability in this sector. Delegates discussed the agreement signed by the Central Bank of Nigeria with the Alliance for a Green Revolution in Africa to develop innovative and responsible financing mechanisms for agriculture. They also discussed the role of banks in this important sector. Questions discussed included:

- What are the key issues for sustainability of agriculture in Nigeria?
- Is sustainability in agriculture a hurdle or an accelerator for economic development?
- How is the Government of Nigeria supporting development of the sector?

CEO roundtable
This was a closed event on the final day of Nigeria Sustainable Finance Week for the CEOs of selected Nigerian banks including the Central Bank. Its purpose was to create awareness of sustainability at the highest levels of industry and to synthesise current thinking on sustainability opportunities and challenges in Nigeria with reference to the financial sector. It led to the signing of a Joint Commitment Statement on Nigeria Sustainable Banking Principles by the CEOs of Nigerian banks, and the establishment of a Strategic Sustainability Working Group. This effort has prioritised sustainability in the agenda of the Nigerian financial sector.

UNEP FI advanced environmental and social risk analysis workshop
The workshop aimed to educate employees of local, regional and international financial institutions in the identification, analysis and management of environmental and social risk generated through their lending and investment activities. The consideration of social and environmental risks in mainstream financial analysis is a growing trend. It offers a wide range of opportunities both for the financial sector and for the promotion of sustainable development.

The session was attended by representatives of financial institutions only, especially risk managers and analysts working in development, commercial, corporate or investment banks.

Nigerian conservation foundation environmental symposium
This part of the event brought all relevant stakeholders together to examine current financial mechanisms supporting local and global environmental issues. The symposium assessed the state of environmental funding worldwide and in Nigeria and examined a variety of challenges associated with environmental funding. Participants included representatives of federal and state government, members of the legislative arm of government, bilateral and multilateral funding agencies, non-governmental organisations and representatives of financial institutions. The speakers were: Mrs Odusote, The Director General, Nigeria Ecological Fund; Kumi Naido, Greenpeace International; Paul Segal, WWF Senegal; and Donald Duke, Former Governor of Nigeria.
We participate in industry-wide discussions and adhere to the Government and regulatory code of standards.
ACAD carbon finance workshop
This one-day seminar on Carbon Financing co-sponsored by the African Carbon Asset Development (ACAD) Facility targeted the needs of credit and credit risk managers and investment officers working within African financial institutions. The objective was to enhance these financial professionals’ understanding of the new business opportunities presented by global carbon trading and carbon credit offset investments in Africa.

After the workshop, participants were able to identify carbon credit generation opportunities in areas such as renewable energy and energy efficiency and to understand how the carbon credit project cycle overlaps with traditional investment project cycles. Specifically, participants also gained insight into how to appraise the risks associated with such investments and how carbon revenue streams could be integrated into equity and project financing structures and modelling.

The training included a case study providing a hands-on simulation involving the financial structuring of a carbon transaction and the negotiation of an emission reductions purchase agreement.

Experts in carbon project development and sustainable finance from Standard Bank, the United Nations Environment Programme (UNEP), and African CDM development organisations ensured delegates benefitted fully from this workshop.

De-regulation roundtable
Following the Nigerian Government’s announcement regarding the proposed deregulation of the downstream oil sector, the Bank organised an executive roundtable to address the issues and probable impact of the policy.

The forum provided an opportunity for the Bank and other key Stakeholders to discuss the economic and business challenges of deregulation.

Power summit
The Bank was the only sponsor from the banking sector at the Power Summit 2011 organised by the Commonwealth Business Council (CBC) in conjunction with the Trade Fair Group and Global Business Report (GBR). The summit was held at the Royal Commonwealth Society Office in London in March 2011. The 2-day event provided a platform for sharing experience and expertise in the power sector. Participants included governments of Commonwealth countries, private companies, technology companies and other power sector Stakeholders.

Access Bank’s approach to tax
The Bank recognises that tax compliance is fundamental to earning and retaining the confidence and trust of its Stakeholders. It provides the structure through which corporate tax objectives of the Bank are set and the means of attaining those objectives.

To ensure compliance with tax laws and regulations, the Bank engages the services of experienced tax consultants, who assist the Bank in implementing various initiatives and carrying out activities aimed at promoting sound tax practices within the Bank.

Some of the initiatives we have implemented include:
- Carrying out tax self-assessments with the overall aim of computing the Bank’s tax liabilities;
- Periodic internal tax self-audit in readiness for annual regulatory tax audits;
- Timely response to tax issues emanating from tax authorities;
- Liaison with relevant tax authorities for timely and amicable resolution of any identified tax challenges; and
- Partnership with tax authorities in the design and implementation of relevant new tax initiatives.

In addition to these activities, the Bank actively participates in the generation of tax revenues to governments (federal and state) through prompt payments of taxes such as corporate tax and education tax. The Bank also plays a major role as a tax collector for the government.

Stakeholder engagement
Engaging with a wide range of Stakeholder groups is important in understanding emerging trends and issues, and the Bank’s potential roles and response. Getting direct feedback from customers and employees and responding is key to our business sustainability. This has given us the opportunity to develop a relationship, allowing us to communicate directly with interested parties, explaining our approach to a range of issues and the future focus of Access Bank.

Access Bank’s major Stakeholders include regulators, government, Shareholders and investors, employees, customers, suppliers, Non-Governmental Organisations (NGOs), communities and the media. We spend a great deal of time ensuring that we listen to all our Stakeholders, respond to their feedback and address their areas of concern, so that we can align our business interests with their interests.

Identifying and engaging Stakeholders
Access Bank’s key Stakeholders are categorised into groups based on their interaction with our business activities. The categories are not mutually exclusive – some groups potentially have interests across a number of category areas. Some areas, such as customers and employees, are all-inclusive; others, such as NGOs, require priority to identify the most relevant groups to engage with.

We gather Stakeholder views through a number of mechanisms, including opinion surveys, focus group discussions on particular issues, regular dialogue with media representatives and NGOs and staff, consultations with consumer groups and involvement in industry-wide discussions.

For example, with customers we conduct customer satisfaction and loyalty surveys, produce quarterly reports, collect feedback from our contact centre and liaise with the customer ombudsman for process and service improvement and new product development. We record problems noted by clients in a central database handled by our customer ombudsman and follow up directly to ensure that systemic problems are corrected.
### Engagement mechanisms used in 2011

Customers

We have always sought to understand our customers better and redesign our services to meet their needs. We continually review our standards and processes to ensure we exceed customer requirements.

Our customers
During the year, the Bank ranked amongst the top 6 banks in Nigeria in terms of service delivery and this was confirmed by our ranking in the 2011 KPMG Banking Industry Customer Satisfaction Survey for Banks in Nigeria, where we came 4th for Corporate and 6th position in Retail. We have taken this as an objective assessment of our performance and have aimed higher for the 2012 KPMG ratings, as well as other globally acceptable assessments carried out by relevant bodies.

Improving quality for our subsidiary customers
Our focus in 2011 was to enhance product knowledge and staff conduct, and to provide a consistently high quality environment within our branches. The Bank has mandated an Innovation Total Quality Management (ITQM) representative at each subsidiary to ensure service quality. These individuals have ITQM as their primary function and drive service in their respective subsidiaries.

The ITQM representatives ensure that they consistently solicit customers’ perception of service and measure the 4 critical success factors of service quality — customer service, ambience, turnaround time and error rate — in their branches. The ITQM teams do this via the Bank’s Project 5-Star performance-improvement project, which is a survey.

The ITQM unit also has responsibility for resolving customer issues in the subsidiaries. To ensure that the Bank continually improves customer satisfaction in the subsidiaries, Service Quality reports are sent to the Head Office in Nigeria on a monthly basis. Customer issues highlighted in subsidiaries outside Nigeria have much in common with those in Nigeria, although there is less emphasis on service failure online or at ATMs. To monitor progress, the Group Service Quality Assurance (SQA) unit consistently measures service performance at all channel points and proposes solutions to the process owners until higher customer satisfaction ratings are realised.

Key issues in the marketplace

Our customers
We ranked among the top 6 banks in Nigeria in 2011 but we aim to do better in 2012.

Customer ombudsman
The Ombudsman process strives for a win: win resolution to ensure that the smooth customer/banker relationship is not disrupted by any complaint.

Customer satisfaction survey 2011
The customer satisfaction survey provides valuable insight about our performance and help drive improvement initiatives.

Project 5-Star performance improvement
Our aim is to achieve a drastic improvement in service delivery.

Customer service week
This was the 4th year in a row that we showed our commitment to quality service.

Communications and promotions
We believe in responsible marketing and advertising.

Financial inclusion
Our Early Savers product helps the young take a step towards financial literacy.

Fighting corruption
Regular employee training has reduced the Bank’s exposure to incidence of corruption and money laundering.
Listening to customers
We strive to achieve customer satisfaction through first-class customer service, treating our customers fairly and dealing swiftly and effectively with any complaints, through an ombudsman if necessary. We only create products and services that our customers want and for which there is a clear market need. In this way, we develop responsible products and services that represent added value to society. In our marketing communications, too, we pride ourselves on our responsible approach. Allied to responsibility is integrity and through all of our business dealings we never fail to take measures to ensure compliance and to fight corruption in all its forms.

We use our Contact Centre, as well as other channels, to solicit customer feedback, while our relevant departments such as IT, Product Development and Research, and Marketing use such feedback in the review and redesign of our processes, systems and products.

Guest frontline service
This new service initiative involves visits by management to the Bank’s branches to assess service quality and analyse customer experiences. This activity was formalised in 2011 and took place every 3 months.

Customer ombudsman
The ombudsman functions as the Bank’s complaint resolution expert by listening to customers, providing and receiving information, identifying and reframing issues, and developing a range of positive resolutions that are acceptable to both the Bank and its customers. The ombudsman liaises with the Investigation Unit, Remedial Assets, relationship managers, marketers and customer care officers in investigating customers’ complaints with a view to resolving them in a timely manner. The ombudsman makes recommendations compatible with the Bank’s policies but is not involved with making binding decisions, or mandating policies, or formally adjudicating on issues on behalf of the Bank.

The Access Early Savers account aims to ensure that every child has access to sound and impartial money guidance.
Resolving complaints

The ombudsman identifies trends, issues and concerns regarding customers’ complaints that may directly or indirectly affect the Bank’s policies, products, services and procedures, including potential future issues and concerns and provides suggestions and recommendations where necessary. The customers’ ombudsman will, within 24 hours of receiving a complaint, write to acknowledge receipt and assure the complainant that his or her complaint is receiving attention. On average, the ombudsman will resolve complaints within 3 to 7 days, depending on the complexity of the complaint and the nature of the reconciliation required in reaching a settlement.

If parties are dissatisfied with the resolution reached, the ombudsman may further mediate to arrive at a fair settlement. If either party is displeased with the outcome, there is a mechanism for escalating the complaint for further action. The ombudsman keeps a log of all complaints received and these are tracked through a weekly report until final resolution.

Training

The ombudsman reports to the Board’s Risk Committee on the trend of complaints received by the Bank and the nature of the resolutions employed. On a quarterly basis, the ombudsman circulates points learned from resolved complaints to business service units. The ombudsman also offers training on root causes of complaints and litigation and examines case studies of complaints with the aim of reducing the level of complaints across the Bank. The ombudsman further circulates an Annual Report of complaints learning points received during the year with the same aim of removing potential causes of complaints and ultimately reducing the overall level of such complaints.

The ombudsman is a board member of the International Ombudsman Association – a body of ombudsmen who network on the nature of complaints and their causes, and who share insights into solutions to complaints at workshops and conferences.

The customers’ ombudsman can be reached through any branch of Access Bank by either filling in a designated form or by handing over the complaint to the customer care officer at any branch of Access Bank. Complaints can also be filed online by sending an e-mail to complaints.ombudsman@accessbankplc.com

Customer satisfaction survey 2011

The ITQM group conducts customer satisfaction surveys all year round in the branches. This is with a view to discern customer needs as well as how our services are meeting their requirements. The surveys also cover other banks’ channels and products. In 2011, the Bank surveyed branches in different regions with the aim of making comparisons. The focus during the year under review was on customer loyalty using Net Promoter Scores (NPS), a system for identifying loyal enthusiasts who will keep using a brand and refer it (ie promote it) to others, so fuelling growth. This is a different approach to measuring just customer satisfaction as it is known that satisfied customers may still defect from a brand. So the loyalty index is what determines the probability that customers will remain with a business irrespective of changing circumstances. The propensity to switch was also determined. We conducted over 100 surveys of this type.

5-Star

The Bank achieved an NPS Customer Loyalty rating of 45.87% and Switch Rate of 20.88% in 2011, compared to the 2010 figures of 38.30% and 18.06% respectively. This shows that the level of customers willing to recommend us to others increased, although the propensity for customers to switch also went up. The general customer satisfaction level was at 4-Star on a 5-Star rating scale. The common customer dissatisfaction issues experienced across the Bank are highlighted below:

- Delay in cheque confirmation;
- Reluctance of staff to attend to customers;
- Frequent system downtime;
• Increased time to process a customer’s transaction;
• Long queues in banking halls;
• Requirement for customer care unit need to be more friendly;
• Customers not informed of branch relocations; and
• Errors or other irregularities in bank statements.

Project 5-Star performance improvement scheme
Project 5-Star is a survey-based performance improvement scheme launched in May 2008 with the aim of enhancing service delivery throughout the Bank across 4 critical success factors: customer service, ambience, turnaround time and error rate. All units and branches are expected to take part in Project 5-Star.

Project 5-Star Results for Access Bank branches
Over 250 mystery shopping and branch visits were conducted in 2011 with a view to ensuring a consistent improvement in service to the point at which the Bank can claim to offer a 5-Star standard in all of its 310 branches and cash centres.

The top graph depicts the 2010 vs. 2011 comparative performance for the Bank’s branches.

The data shows that telephone etiquette, error rate and turnaround time (TAT) improved by 26.72%, 24.25% and 8.97% respectively from 2010 to 2011. However, customer service and ambience decreased by 1.67% and 4.87% respectively.

Overall service quality improved marginally by 2.4% in 2011 over 2010. The Bank achieved an overall rating of 3-Star for branch services across the network.

Implications
The improvement in turnaround time and error rate will reduce the waiting time and long queues experienced in the banking hall. This should result in higher patronage and repeat business, which in turn should bring higher income.

Although the level of customer service and ambience slightly decreased, we have taken active measures to reverse the trend by training staff in the expanded network and improving the façade at our branches.

Resolution
The minimum acceptable service quality rating for our branches in 2012 is 4.5-Star. Therefore, the focus for 2012 is to enhance service delivery via intensive training of new staff, improve branch façades, revitalize the Project 5-Star Performance Improvement...
Customers continued

During customer service week in 2011, the Bank took the opportunity to communicate its commitment to quality service and generally boost employee morale, motivation and teamwork.

Scheme and introduce service quality volunteers to uphold quality standards at the branches.

Commercial Banking Division
Results
The staff's level of confidentiality was good at 89.30 – this is equivalent to a 4-Star rating. Customer service, comprising staff conduct, product knowledge and reliability, was average at 70.32 – equivalent to a 3-Star rating. Overall performance for the Bank's Commercial Banking Division was 3-Star.

Retail Banking Division
Results
The staff's level of confidentiality was very good at 96.66% – equivalent to a 5-Star rating. Customer service (staff conduct, helpfulness, product knowledge and reliability) was much lower at 68.74, only a 2-Star rating. Overall performance for the Bank's Retail Banking Division was 3-Star.

Head office units
Over 80 reviews were carried out in head office units to assess Project 5-Star service quality. The top bar chart on page 27 depicts the comparative performance between 2010 and 2011.

Results
There was an improvement in all Project 5-Star critical success factors with an overall improvement of 14.75% for the head office units.

Subsidiaries
The Project 5-Star Performance Improvement Scheme was conducted for the subsidiaries in February 2010 and assessments used the same parameters of speed of service delivery, error-free processing, customer service and ambience. The aim once again was to improve service delivery.

2011 Project 5-Star ratings for our Commercial Banking Division: distribution of ratings between 1-Star and 5-Star

2011 Project 5-Star ratings for our Retail Banking Division: distribution of ratings between 1-Star and 5-Star
Results
The general customer satisfaction level for subsidiaries in general was 4-Star on a 5-Star rating scale. However, they experienced very low customer loyalty rates as shown below:

Resolution
The focus for 2012 will be to improve on customer service delivery.

Customer service week
The Bank joined the global community in celebration of the annual customer service week. The 2011 version of the event was themed Recharge, Refresh and Reconnect and this was the fourth time the Bank took the opportunity to communicate its commitment to quality service, heighten awareness among employees of customer service, and generally boost employee morale, motivation and teamwork.

Activities
The programme for the week included the following:

- Customers received service week greetings via e-mail, SMS and ATM display messages;
- Thank you cards signed by Aigboje Aig-Imoukhuede (the Bank’s Group Managing Director and Chief Executive Officer) were handed out to customers;
- Branches were decorated with balloons and ribbons in the Bank’s corporate colours and staff members at the branches were dressed with a touch of orange;
- Customers were served with tea and cookies between the hours of 8:30 a.m. and 11:30 a.m.;
- Senior management staff served in various frontline capacities at our branches to improve customer engagement;
- Branches held ‘Pick-and-Win’ contests for customers; and
- TGIF was held by all the branches as a form of appreciation of their hard work in serving customers.
Feedback
Customers were excited about this special treatment and feedback received included:

“This is very interesting, I have never experienced this before even in the bank I work in.”

“I did not expect to win anything out of the numerous customers that visited the branch today, I am grateful.”

“I enjoy the service I get from you people. Since I started banking with you, I have had no issues.”

“Let me go and withdraw my money from other banks and bring it to Access Bank.”

The Access brand was reinforced through the week as a truly service-oriented organisation. A better celebration in 2012 is in the making.

Communications and promotions
We recognise that marketplace perceptions and reactions to business behaviour are critical to corporate success. We therefore engage in responsible marketing and advertising, using the media as a communication tool that positions the Bank as a choice for all our Stakeholders. Our marketing practices focus on building and maintaining sustainable, long-term relationships with our customers and relevant Stakeholders, while avoiding misleading marketing and advertising.

Our marketing communication strategy provides an overall framework for managing and co-ordinating a wide variety of activities that directly or indirectly inform and engage Stakeholders. It addresses communicators, Stakeholders, messages, channels, feedback mechanisms and message timing, while mapping out links between all these aspects. This Strategy ensures that the Bank provides relevant, accurate and consistent information on its activities.

Our approach to responsible marketing communications is to adhere to prevailing national laws, standards and voluntary codes covering any form of advertising, promotion and sponsorship. In line with this, the Bank adheres strictly to the laws and provisions of the Advertising Practitioners Council of Nigeria – APCON – that regulates and controls advertising practices in Nigeria.

Customer engagement campaign for Access Advantage
The Bank ran a successful customer engagement campaign for its Access Advantage savings account product entitled “Take The Lead”. Running from June 2010 to end of March 2011, the promotion rewarded loyal customers who built their balances by N50,000 and maintained their balance for 60 days. During the campaign, 25 Peugeot 407 cars were awarded as prizes to the lucky winners. A grand finale was held in April 2011 to reward the last 5 lucky winners.

To ensure the credibility of the selection process, the draw was witnessed by Mrs Ngozika Obidike, Consumer Protection Council (CPC), Mrs Toyin Daramola of the Lagos State Lotteries Board, journalists and employees from the Bank.

End of year activities
The Christmas and New Year celebrations gave us another opportunity to show appreciation to our customers for their patronage and support during the year through a programme that included the following features:

• Season’s greetings sent to customers via SMS, e-cards, publications and ATM display messages;
• Christmas carols played in banking halls;
• Staff members wearing Santa hats to capture the Christmas mood;
• Refreshments served to customers; and
• Gifts handed out to visiting customers at the branches.

A number of customers congratulated the Bank for expressing its appreciation their patronage and loyalty.

Valentine’s Day celebration
The Bank also marked the celebration of Valentine’s Day with customers in the year 2011 with the following programme:

• Chocolates were offered to visiting retail customers at the Bank’s branches;
• Account officers distributed cards and chocolates to commercial customers; and
• Valentine messages were sent out to customers via SMS and e-mails.

Customers continued
By 2015, we aim to provide 1 million kids with the grounding in financial literacy they need to lead financially secure lives.
Financial inclusion
We have a proud tradition of helping generations of young people learn about the importance of saving and smart money management. By 2015, we aim to provide 1 million kids with the grounding in financial literacy they need to lead financially secure lives. One of the main ways we have committed to this goal is by establishing series of products which encourage savings from the cradle to adulthood.

Our Early Savers account
The Bank’s long-standing commitment to financial inclusion is evident through our partnership with Nickleodeon’s Dora the Explorer and the introduction of the bespoke Access Early Savers account. This new product aims to ensure that every child has access to sound and impartial money guidance from the earliest age.

Our Early Savers account aims to help society by:
• Contributing to the social and/or economic development of children;
• Reducing inter-generational poverty;
• Helping a child accumulate assets at an early age;
• Motivating young people to enter formal financial systems so that they build assets in their youth and throughout their adult lives, in a way that ultimately leads to economic and social advancement for themselves and their families;
• Protecting children from future economic shocks and helping them build a store of resources for future investments; and
• Promoting overall development within society.

Our Early Savers product gives our young customers an easy, fun and interactive way of learning about the money management skills they will use for the rest of their lives. Through this programme, kids can bank at school and so gain a hands-on banking experience in a fun and interactive environment.

Fighting corruption
Section 9 of the Money Laundering (Prohibition) Act 2004 states that every financial institution must develop training programmes to combat the laundering of the proceeds of crime or other illegal acts.

The CBN Anti-Money Laundering/Counter Terrorism Financing (AML/CFT) Compliance Manual also states that financial institutions should develop employee training programmes under the guidance of the AML/CFT Compliance Officer. In collaboration with Senior Management, they are required to give training on basic elements of anti-money laundering regulations and offences, money laundering and suspicious transactions, customer due diligence, record keeping and retention policy, and related money laundering issues.

Regular AML/CFT training programmes for bank employees is of paramount importance because banks are one of the major channels through which the proceeds of money laundering are channelled.

Training in anti-money laundering
In response to the CBN’s requirements, we run a range of training programmes to ensure our employees have the skills and knowledge required to help combat corruption and money laundering. This training aims as follows:

• To ensure compliance with the requirements of the Money Laundering (Prohibition) Act, 2004 and the Central Bank AML/CFT Regulation 2009;
• To acquaint employees with the use of ‘know-your-customer’ as a business tool and anti-money laundering international best practices standards;
• To provide an interactive session for capacity development and beneficial information sharing among members of staff on AML/CFT related issues; and
• To educate members of staff on Money Laundering ‘red flags’ and suspicious transactions.

Actions taken in response to incidents of corruption
We have also established a set of procedures for responding to incidents where we believe there is evidence of corruption. The first step it to undertake an investigation into any allegation of corruption. If our findings give us cause for concern, we refer the matter to the police. We will also endeavour recover any losses that arise as a result of corruption.

Monopoly practices
In the year under review, there was no legal action against the Bank in connection with anti-competitive behaviour, anti-trust or monopoly practices.
Building a high-performance workforce

The Bank seeks to encourage a sense of ownership in all aspects of its business. We also ensure that our practices develop requisite professional and ethical behavioural standards, deliver superior client service, and embrace sound financial discipline while recognising and rewarding performance. Our objective is to have a well-motivated staff who experience career satisfaction and take pride in working for a respected organisation offering progressive career development.

Recruitment criteria

As a merit-driven organisation, the Bank is committed to providing equality in employment for all staff. Quality and merit are the primary considerations when recruiting and this cannot be compromised.

At the entry level positions, we are interested in young, energetic, results-oriented and highly intelligent individuals with a demonstrable passion for joining our team of high-performing professionals. Their career journey begins with a 4-month intensive training course at our Banking School of Excellence. In terms of hiring people with existing work experience, we look for ambitious, self-motivated individuals with leadership qualities who are inspired to exceed customer expectations.

The Bank recruits via a web based e-recruitment portal which provides a platform for equality and transparency in the recruitment process. At our Banking School of Excellence, the performance of each trainee is set against clear and objectively defined benchmarks, which in turn determine the trainee’s absorption into the organisation and subsequent evaluation.

Diversity and human rights

The Bank is committed to respecting human rights in all its business activities through compliance with national laws and in labour legislation. Our workplace policies and practices are aimed at shaping corporate culture and guiding relationships between the Bank and its Stakeholder groups.

Key issues in the marketplace

Building a high-performance workforce
Our responsible human resources practices help our staff to develop to their full potential.

Diversity and human rights
We pride ourselves on implementing best-in-class workplace policies and practices.

Employee engagement
We engage our employees through a range of strategic initiatives.

Employee satisfaction and motivation
Our Annual Employee Survey continues to demonstrate the success of our human resources strategies.

Female empowerment
We are providing women in our workforce with the support they need to build their careers.
Individual rights

The UNUDHR contains internationally accepted standards for human rights and applies to governments and businesses. The general principles related to business practices are:

- Safe and healthy working conditions;
- Non-discrimination in personnel and hiring practices;
- No forced or child labour;
- Rights to basic health, education and housing (if operations are located in areas where these are not provided);
- Respect for existing international guidelines and standards for the use of force;
- Protecting the economic livelihood of local communities; and
- Contributing to the public debate about matters that affect our operations, employees, customers and the communities in which we operate.

The Bank has a responsibility to ensure that human rights are upheld in all its lending decisions, all its interactions with staff and those of suppliers and contractors through procurement and supply chain management.
As a member of the United Nations Global Compact (UNGC) the Bank is committed to upholding the 10 principles of the UNGC in respect of human rights, labour rights, environmental protection and anti-corruption. The Global Compact seeks to promote responsible corporate citizenship, so that businesses can form part of the solution to the challenges of globalisation.

Eliminating discrimination and encouraging diversity
The Bank has measures to eliminate discrimination and encourage cross cultural interaction, as well as tolerance of diversity. The non-discriminatory practices extend to the Bank’s hiring and recruitment activities.

We are committed to upholding ethical practices across our operations and will not engage in forced or compulsory labour, or take part in direct operations that involve child labour.

In 2011, we launched a programme to ensure a higher recruitment rate of people from the northern part of Nigeria. This initiative aims to increase the proportion of the Bank’s total workforce from the northern region, which currently stands at a very low level.

Employee engagement
As key Stakeholders, employees are actively engaged and managed through a range of initiatives.

Recognition and rewards
The Bank recognises and rewards employees who make significant contributions to the organisation at 3 different levels: contribution to team, to division and to the bottom line. We also have a long-service award to recognise staff who have completed 5 and 10 years' service with the Bank.

Retreats
The Bank periodically holds retreats off-site in order to engage employees in strategy and organisational development. A number of divisions held retreats during 2011.

The Bank provides an enriching employee experience with opportunities to pursue rewarding and challenging work with talented and supportive colleagues, learning and development opportunities, benefits that have the flexibility to meet employees’ needs, fair and competitive compensation, and support for work/life effectiveness.

Meetings
We reinforce organisational culture and values, and strengthen internal communication, through different meetings. A calendar of corporate meetings is displayed on the Bank’s intranet. In 2011, this calendar included management meetings, meetings for MDs of the Bank’s subsidiaries, and other similar events.

Employee satisfaction and motivation
The objectives of the 2011 Employee Satisfaction Survey were as follows:

- To measure the level of employee satisfaction in 2011 and understand how the trend has changed from 2009;
- To conduct a health-check of the bank from the perspective of employees; and
- To obtain insight into what motivates employees and what drives workforce attrition levels in Nigeria.

Participation
The participation rate was 73% as against a plan of 85%. There was a 7% drop in the participation rate against 2010. The top and bottom Groups are as shown below.

Satisfaction index

The overall satisfaction level for Nigeria has remained stable over the last 3 years at 3.5. However, in absolute terms, there was an improvement in 2011 (74.2%) over 2010 (71.5%).

There was a decline in work-life balance from 1.5 to 1; while compensation and benefits reduced from a score of 3 to 2.5.

Summary of comments

Culture and climate

- Access Bank should continue to take the pulse of staff and explore other opportunities for open communication;
- The Bank should continue to build an employer brand in order to attract and retain the best talent in the industry and culture of respect and co-operation should be embedded throughout the organisation; and
- Work-life balance is very poor across the Group: working extended/late hours, weekends and/or public holidays should be discouraged.

Compensation and benefits

- The Bank should enhance remuneration practices through salary increases, mortgage loan increases, and greater flexibility in loan security.

HR issues

- Poor staff retention: low morale and motivation among staff;
- Frequency and duration of meetings need to be reduced;
- HR needs to be more approachable and interactive;
- Staff should be made to feel more secure and their personal concerns given more consideration;
- Inadequate staffing levels as well as an experience and skills deficit; and
- HR can increase staff confidence by addressing the results of the survey.

Supervisors

- Supervisors should focus on rewarding good behaviour rather than punishing poor behaviour;
- Supervisors should also be courteous and more empathetic in dealing with subordinates; and
- A bottom-up approach to decision making and issues resolution should be encouraged.

Performance management

- Performance management and reward systems should be transparent and consistent across different divisions;
- The input of direct supervisors should be given more consideration in appraisals (especially in Branch Services); and
- Promotion guidelines should be made clearer as there is a perception promotions are generally delayed.

Safety and work environment

- The IT infrastructure needs to be enhanced to reduce system downtime.

Training

- Staff do not receive the training required for them to operate at the level required of them.
- While there are good self-education and online resources available, work pressure means there is little time to use these.

Staff attrition: January – December 2011

Benefits to full-time employees

The Bank’s practices on benefits to its employees are as follows:

- Club subscription – AGMs and above;
- Financial assistance:
  - Personal loan – all staff with SIT and subject to confirmation requirements
  - Salary advance – all staff with SIT and subject to confirmation requirements
  - Vehicle loan – ETs to Managers
  - Mortgage loan – SMs and above
  - Staff credit card – staff with SIT;
- Group insurance;
- Leave – Annual leave, length leave, assorted leave, maternity leave, sick leave, examination leave;
- Relocation allowance;
- Welfare benefits; and
- Pension scheme.

Female empowerment

In 2011, management approved the launch of a Female Network with the aim of providing women within Access Bank with the opportunities, tools, networks and support they require to assume future leadership roles within the organisation.

Objectives

- Enhance women’s professional growth by providing information on coaching, career paths, flexibility and role models;
- Develop new and existing talent;
- Foster the retention and promotion of women especially at officer and mid-management;
- Improve the Bank’s ability to attract, develop and retain women from diverse backgrounds; and
- Cultivate leadership competencies.

Key activities

<table>
<thead>
<tr>
<th>S/N</th>
<th>Activities</th>
<th>Detailed task</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Mentoring</td>
<td>• Female Mentorship Programme to encourage women to seek top management positions and to help them prepare for such positions; • Coaching sessions that provides candid feedback on development needs; and • Counselling sessions.</td>
</tr>
<tr>
<td>2</td>
<td>Capability development</td>
<td>• Identifying growth opportunities such as the development of emotional intelligence to improve competencies; • Identifying and providing in-house training courses to develop leadership capabilities; and • Success planning by defining each woman’s concept of success and supporting them in creating a roadmap that will allow them to achieve their selected success.</td>
</tr>
<tr>
<td>3</td>
<td>Annual networking events</td>
<td>• An annual network event that will address topics of general interest to women in the bank and enhance their productivity in the Bank; and • Sponsorship of mid-management women and high-potential women to other high-power female networks, for example WimBiz.</td>
</tr>
<tr>
<td>4</td>
<td>Cluster network events</td>
<td>• Forums for women to outline challenges encountered in the workplace so they can receive support from other women who have been through similar situations.</td>

</tbody>
</table>
Throughout our operations, there is a strong commitment to minimise the Group’s impact on the environment.

Our environmental impact

We take our role in supporting the transition to more sustainable uses of natural resources very seriously. The Bank recognises that business growth implicitly depends on a stable future for human society so we support any responsible effort that protects and conserves the environment.

As a financial services group, we have both direct and indirect impacts on society and the environment. In respect of both of these, our goal is to improve the way we use resources and curtail environmental impacts.

Direct environmental impacts: Operational areas that involve the management of energy use, paper use, waste management, and procurement.

In managing our direct impact, we have developed systems and processes to reduce our environmental footprint. In addition, we have raised environmental awareness among our Stakeholders, particularly our employees and suppliers. The environmental management system enables us to track and manage environment-related aspects of our operations such as energy, water, carbon emissions and waste management.

Indirect environmental impacts: Developing products and services with an environmental dimension, and factoring in the environmental and social risks of the Bank’s policies.

We manage our indirect impact by screening corporate banking loans to ensure that the customers we lend to manage the social and environmental risks associated with their activities. We impact directly on the environment in our daily business activities through our consumption of energy.

Climate change

We advocate a proactive response as tackling climate change will require a concerted effort between government, business and individuals. The impacts of climate change can already be seen and there is no question that climate change will continue to impact our customers and our own operations, which is why the issue is central to our business strategy. The Bank has embarked on new environmentally friendly initiatives and we are irrevocably committed to reducing our carbon footprint.
Investor Statement

The Investor Statement on a Global Agreement on Climate Change was originally produced by a group of four investor and finance sector associations: the United Nations Environment Programme Finance Initiative (UNEP FI); the Investor Network on Climate Risk (INCR); the Institutional Investors Group on Climate Change (IIGCC); and the Investor Group on Climate Change/Australia and New Zealand (IGCC). The statement was issued in 2008 in the run-up to the UN Framework Convention on Climate Change in Copenhagen in December, 2009.

The Bank, as a committed member of the United Nations Environment Programme Finance Initiative (UNEP FI), signed on to the statement at that time to demonstrate the importance that investors attach to a strong, credible and effective global agreement on climate change.

This statement continues today to reflect our own stance as a business on climate change. It outlines in detail what investors are looking for from policymakers in order to allocate capital in a way that supports both the transformation to a low carbon economy and the development of adaptation measures. This includes:

• A binding global target for reducing greenhouse gas emissions, the reductions are informed by the latest available scientific evidence for avoiding dangerous climate change (which suggests that global greenhouse gas emissions must decline by between 50% and 85% by 2050 versus 2000);
• Long- and medium-term emissions reduction targets for developed countries which will be backed up by effective national action plans;
• Contributions from developing countries, initially in the form of national action plans focused on energy efficiency commitment, but with the ultimate aim of absolute emissions reductions;
• Continuity in the legally binding framework underpinning the carbon market and provisions for an expanded and more liquid global carbon market;
• A review, reform, and expansion of the Clean Development Mechanism;
• Clear measures to reverse deforestation and value forests as carbon sinks; and
• A commitment to adaptation in order to prepare for, and respond to, the physical impacts of climate change.
Environment
continued

Carbon footprint management
Projects currently running as part of our footprint management include:

Paperless processes: To reduce cumbersome paperwork, we have invested in a ‘workstation’ software that automates basic bank operations and processes;

Paper usage: We have instituted and communicated paper usage policy, which advises staff to avoid printing. However, if necessary, printing should be done on both sides of a paper. Where applicable, paper can be re-used. This has helped reduce paper wastage across the Bank; and

Energy reduction: our 8 o’clock shut-down policy and other energy reduction initiatives have seen the Bank make progress in its quest for environmental sustainability.

Sustainable finance
We manage the potential social and environmental risks associated with our lending and investment by following international standards of good practice, such as the Equator Principles, which apply to project finance.

We are also in the process of developing policies for lending to socially and environmentally sensitive sectors and creating a toolkit to capture transaction impacts/risks, recommend outcomes for risk management approaches, and define monitoring and reporting requirements.

Equator Principles for project finance
The Equator Principles (EP) Report is a framework to help financial institutions address potential environmental and social risks when providing project finance loans or project finance advisory services. Since adopting the principles in June 2009, we have integrated the principles as a risk management measure when assessing which projects to finance. In addition, we have put in place appropriate procedures that ensure total compliance with the Principles.

Environmental and Social Risk Management (ESRM) Policy
The Bank has adopted an Environmental and Social Risk Management Policy (ESRM) which includes implementation of the Equator Principles for its transactions and which, through the International Finance Corporation’s environmental and social performance standards, addresses issues such as labour and working conditions, community health and safety, land acquisitions and resettlement, and the treatment of indigenous peoples.

Our ESRM Policy requires that all business operations and lending decisions include consideration of risks such as climate change, including the physical risks resulting from extreme weather and other changes. It also covers the impacts of clients’ activities on biodiversity, deforestation, air pollution and water pollution. We use our comprehensive ESRM Policy to screen transactions, advise clients, and promote environmentally and socially sound ways of doing business.

The Bank has comprehensively reviewed its ESRM Policy with input from relevant internal and external Stakeholders. This provides the framework, policy and procedures for assessing and managing E&S risk issues within all relevant business activities of the Bank. To this end, we apply the Equator Principles and the IFC Performance Standards to our project finance and other lending transactions across our strategic business units. For loans, debt and equity underwriting, as well as financial advisory and derivative transactions that are project linked, the Bank applies an assessment technique that is broadly consistent with an Equator Principles approach.

The Bank’s ESRM procedures comprise 6 distinct components for the management of environmental and social (E&S) risks that emerge in our credit/investment cycle. Each component represents a critical step in the Bank’s integrated ESRM approach to the products and services we offer. These components are:

1. Screening;
2. Risk Assessment;
3. Due Diligence;
4. Decision and Documentation;
5. Monitoring; and
6. Reporting.

Our use of video conferencing in the Eastern and Northern regions of Nigeria has impacted hugely on our carbon footprint.

Environment continued

Our use of video conferencing in the Eastern and Northern regions of Nigeria has impacted hugely on our carbon footprint.
Inclusion of sector specific policies

Beyond the review of the Bank’s ESRM policy, specific policies for higher E&S risk exposure sectors (oil & gas, and cement) have been developed and deployed across the Bank.

Evaluating project finance proposals

We also use a web-based suite of decision-support tools to enhance the screening of transactions by:

- Providing a framework for the identification and assessment of E&S impacts and risks according to financial product type, sector, client and country;
- Capturing transaction impacts and risks and assessment outcomes as a basis for developing management approaches and reporting across the portfolio (internally and externally); and
- Offering potential solutions to mitigate E&S risks commensurate with the scale of impacts.

In general, the toolkit will help the Bank to reduce the time involved in managing and monitoring risk exposures.

The result is that the Bank’s project prospects are now screened for inherent social and environment risks associated with the project and classified under the following, based on the outcome of the risk assessment:

Category A: High Risk: Projects with potential significant adverse social or environmental impacts that are diverse, irreversible or unprecedented;

Category B: Medium Risk: Projects with potential limited adverse social and environmental impacts that are few in number, generally site specific, largely reversible and readily addressed through mitigation measures; and

Category C: Low Risk: Projects with minimal or no social or environmental impacts.

Energy consumption

The Bank actively manages its energy consumption. We do this as part of our continuing work on making the Bank more sustainable. We are mindful too of the rising cost of electricity in Nigeria.

Our direct energy consumption from primary sources is from the Power Holding Company of Nigeria (PHCN). In 2011, Access Bank consumed about 10,272,021.33 kWh of PHCN power based on a billing tariff of N15/kWh for branches, head office and annexes (compared to 8,888,878.05 kWh in 2010). We also used about 23,877,600.00 kWh of diesel-generated power based on 75% utilisation of generator-installed capacity. Energy saved due to conservation and efficiency improvements based on the Bank’s 8:00 p.m. generator shut-down policy was 2,439,258.66 kWh while 2,984,700 kWh reduction was achieved on indirect energy consumption. Our approach to energy management is to minimise our CO₂ emissions and carbon footprint as much as possible within the confines of our operating environment.

Water usage

The Bank’s water comes from 2 major sources: boreholes and the Government (the state-owned Lagos State Water Corporation). This has a three-fold negative impact: it reduces this limited natural resource; it causes significant greenhouse gas emissions through desalination processes and trucking of water; and it contributes to other undesired vehicle emissions.

Reducing our operational water footprint is part of our environmental strategy to solve the triple negative impact of water and we have put measures in place to report our water usage and how we recycle and discharge water.

Business transport

The Bank’s car fleet is managed by its General Resources Management Group. We are always conscious of the hazards of poor management of our fleet system and have taken steps to minimise its impact on the environment, as follows:

- We provide buses to transport employees within different regions to the Bank’s service outlets. This has helped reduce the daily use of personal cars by staff;
- Our cars are constantly maintained and assessed to meet the minimum requirements of roadworthiness. The cars in our fleet are serviced regularly to ensure they produce minimum pollution;
- We dispose of older cars that have deteriorated to the extent that their use may impact negatively on the environment; and
- Our use of video conferencing in the Eastern and Northern regions of Nigeria has impacted hugely on our carbon footprint. Video conferencing has helped to cut our travel costs.
**Paper and materials**

We have long worked on reducing the paperwork involved in our basic banking processes. In previous years, we purchased software that negates the need for paperwork in certain processes. We have communicated to staff our paper usage policy, which includes printing on both sides of a sheet and printing memos on reused paper. Our practice of printing front and back continues for all internal correspondence. The Bank has also outsourced its printing and photocopying to reduce wastage. This initiative also ensures proper monitoring and tracking of printing and photocopying activities throughout the Bank. Paper constitutes some 98% of materials consumed by the Bank.

All the paper we use is manufactured from recycled materials. The Bank consumed about 132,113 reams of paper in 2011, which is approximately 79,268kg at 0.6kg per ream. This compares to about 91,130.45 reams of paper consumed in 2010. The marked increase in the amount of stationary consumed in 2011 was due to the Bank’s customer acquisition programme Operation Just Cause and the significant volume of work associated with completing the merger with Intercontinental Bank.

**Environmental, social and corporate governance integration**

In 2009, the Bank commenced the strategic integration of Environmental, Social and Governance (ESG) issues into its business operations. The review takes all significant ESG issues into consideration while ensuring that our business operations do not degrade the environment or cause social harm. In 2009, the Bank signed up to the United Nations Global Compact (UNGC) and the Equator Principles (EP). The Bank has continued to bring ESG issues to bear on its operations each year since that time, as follows:

**2009**
- Signed up to the United Nations Global Compact (UNGC) and Equator Principles (EP); and
- Trained employees in the dynamics of Environmental & Social Risk Management.

**2010**
- Developed customised sustainable finance toolkit for assessing lending activities, in line with the Equator Principles (EP);
- Undertook capacity building for Nigerian financial institutions regarding techniques and benefits of incorporating environmental and social considerations into investment and risk management decision-making;
- Conducted Gap Analysis and identified policy, capacity development and reporting approach;
- Conducted Cost Benefit Analysis (CBA) with findings covering identifiable non-financial terms as well as financial terms. These helped in accessing the total expected costs against the expected benefits of implementing ESG considerations in our project financing and other lending activities;
- Customised sustainable finance tool kit to assist in capturing transaction impacts/risks, and determining recommendations as well as reporting requirements of lending activities; and
- Developed polices for the cement and oil-and-gas sectors.

**2011**
- Initiated and implemented the first-ever Nigeria Sustainable Finance Week;
- Initiated the concept of the Nigerian Sustainable Banking Principles;
- Signed joint commitment statement on Nigerian Sustainable Banking Principles with other financial institutions in Nigeria;
- Secretariat to Strategic Sustainability Working Group (SSWG) with responsibility for developing the Nigerian Sustainable Banking Principles;
- Signed joint statement on Nigerian Sustainable Banking Principles with member banks.

**E&S issues in investment and risk management**

As part of the Bank’s sustainability agenda, a workshop was organised for credit officers, analysts, risk officers, product managers and E&S specialists of the Nigerian financial sector. The workshop focused on the importance, as well as the effective techniques and consequential benefits, of incorporating environmental and social considerations into investment and risk management decision making. This was implemented in partnership with the FMO, IFC, African Development Bank and Proparco. The workshop discussions reached the following conclusions:

- Nigeria’s economy creates a specific range of E&S issues to be addressed by its banking sector;
- E&S risk management helps to minimise the harmful E&S impacts in banking.

**Environment continued**

Access Bank makes a significant contribution to sustainability through its investments. These investments aim to set the highest standards of corporate governance and promote environmentally sound and sustainable development.
• E&S impacts represent financial, reputational and legal risks for banks;
• Effectively managing these risks contributes towards the positioning of a financial institution with respect to competitors, clients and capital providers;
• Understanding what lies behind E&S risks can create a foundation for developing products and services that address the E&S issues of clients;
• Setting up an E&S Risk Management System requires the following:
  − Development of E&S policies and procedures which may be general, industry specific, issue specific, country specific. This should also contain an exclusion list
  − Development and implementation of E&S risk assessment tools for clients and transactions
  − Integration of E&S policies, procedures and tools into existing processes
  − E&S due diligence for new and existing clients and transactions
  − Training and engagement of staff at all levels of seniority
  − Measuring, monitoring and reporting E&S performance;
• Through E&S risk management, individual financial institutions can:
  − Differentiate from other institutions
  − Engage with Stakeholders
  − Gain access to capital
  − Improve overall risk management
  − Develop responsible business.
Key objectives and goals
The Bank’s standard procurement framework facilitates proper assessment of our vendors and enhances our standing in the business community.

We conduct assessments of vendors bi-annually in line with the Bank’s policy, examining the following criteria:

1. Track record;
2. Ethical values;
3. Geographical distribution;
4. Quality of service;
5. Price; and
6. Authorised dealership.

Redflag
Redflag is an indication that the vendor’s service is not up to standard and needs to be monitored over the subsequent appraisal period.

However, if there are no changes after a series of letters and meetings, which will indicate the vendor is facing challenges maintaining its contract, a recommendation will be made to management to remove the supplier from the Bank’s official vendor list.

Spending tracking system
The Bank purchased software which integrates project budgeting, purchase orders, invoices, labour, and material tracking with the Work Order/Work Request System. Currently, requisitions for items are routed via this system. This will enable the Bank to track its procurement spend as well as provide analysis, which will aid future planning. The aim is that in the next 2 years the Bank’s entire procurement process will be fully automated. In addition, the Bank’s Operational Risk Management Unit also conducts due diligence on vendors to ensure they meet the Bank’s standards and requirements. The Bank also sets KPIs for vendors and ensures that they comply with these.

Supply Chain

We are seeing good progress in making our supply chain more sustainable
Engaging suppliers
Vendors are engaged through the following means:
1. Quarterly meetings;
2. Site visits; and
3. An invitation to our Annual General Meeting.

Quarterly meetings – agenda
1. Vendor’s performance and improvement;
2. Bank’s performance;
3. Payment terms; and
4. CSR issues:
   • Child labour;
   • Business ethics;
   • Eco friendly equipment; and
   • CSR activities.
The Bank focuses on Health, the Arts, Education, Environment, and Sports. It engages with relevant Stakeholders to address community issues while encouraging employees to contribute ideas, skills and resources through its Employee Volunteering scheme.

The fight against AIDS, TB and malaria in Sub-Saharan Africa

In terms of AIDS, TB and malaria, sub-Saharan Africa remains the worst-affected region in the world, hosting two-thirds of the total number of people infected by the triple pandemic. People aged between 15 and 24 are among the hardest hit, with this section of the population reporting the greatest number of new infections. Since this same demographic represents the future workforce of African economies, the triple pandemic poses a serious threat to Africa’s economic growth.

The impact of AIDS, TB and malaria on the private sector is particularly complex. The short-term and long-term business costs are inevitably high since they reduce consumption, profits, tax revenue and investment, result in shrinking of intellectual capital, institutional memory and business contacts/networks, and affect the quality of essential services.

Best conducted as a partnership between government, private sector, and labour organisations, the fight against AIDS, TB and malaria is clearly for the public good as the pandemic can significantly affect social and economic development. The Bank has been at the forefront of the private sector response through a number of initiatives that address the United Nations Millennium Development Goal 6 – Combating HIV/AIDS, Malaria and other diseases.

Specific initiatives have involved capacity building, education about disease prevention, treatment, care and support, as well as communications and networking in all the countries in which the Bank operates. These have sought to reduce the effect of the pandemic on employees, their families, supply chains, clients and society in general. The Bank strongly believes that with adequate information, people can be helped to understand the diseases, so that they in turn prevent transmission and ultimately become non-discriminatory towards other people living with HIV/AIDS.
Highlights of our work:

- In addressing the triple pandemic, the Bank has been able to reach about 400,000 people with relevant prevention and treatment information via platforms such as its website, ATMs, talk-shops and community outreach programmes; and
- Currently, Access Bank is partnering with the Discovery Channel Global Education Partnership (DCGEP) on the production of a prevention and educational film entitled Inside Story – The Science of HIV/AIDS. A comprehensive, multi-year distribution strategy will help the film to reach as many as 300 million people.

Health education in the workplace

Working in partnership with Friends of the Global Fund Africa in the last quarter of 2011, the Bank conducted a workshop series that trained 1,250 small and medium enterprises (SMEs) in developing workplace policy and programmes on AIDS, TB and malaria. The training was conducted in Zambia, Rwanda, Nigeria and Ghana. These SMEs will help some 22,500 employees and 90,000 of their dependents in making informed behavioural and medical choices that help prevent the spread of the triple pandemic. The four-country workshop series follows the inaugural programme in Nigeria.

In a continent where one-third of SMEs expect AIDS, TB and malaria will have a negative impact on their business in the coming year, the workshop series is a powerful way of helping African business. This initiative gives African companies the tools they need to address the 3 pandemics with the aim of mitigating the worst effects and promoting a strong African private sector. Delegates expressed strong appreciation for the aims and content of the workshop series.
**Policies and implementation**

The workshops taught participants about workplace policies and how to implement them. Delegates learnt about the statistics on HIV/AIDS, TB and malaria in their countries, as well as the qualitative and quantitative impacts these diseases have on the African workforce and workplace. They studied how appropriate, evidence-based workplace policies can manage and mitigate the impact of the 3 diseases and heard how government, NGOs and other private sector organisations can support Zambian, Rwandan, Nigerian and Ghanaian businesses in fighting these pandemics. The workshops also looked at the cultural barriers to addressing AIDS, TB and malaria, with a focus on the cultural values around these 3 diseases and how to overcome stigma and involve men further in family health.

**Technical partners**

Key technical partners involved in the workshop are:

- Global Business Coalition for Health (GBCHealth);
- Nigeria Business Coalition Against AIDS;
- Ghana Business Coalition Against AIDS;
- Rwanda Biomedical Centre;
- Zambia National AIDS Council;
- National Agency for the Control of AIDS (NACA) Nigeria;
- National Malaria Control Programme, Ghana;
- Lagos State AIDS Control Agency;
- Zambia Federation of Employees;
- Rwanda Private Sector Federation; and
- Ghana AIDS Commission.

**Lusaka, Zambia**

The workshop was held on 17 October in the Intercontinental Hotel and was opened by the Honourable Deputy Minister of Health, Dr Patrick Chikusu. Other dignitaries included Ms Omobolanle Babatunde, Head of CSR, Access Bank, Mrs Mukwandi Chibesakunda, CEO of Access Bank Zambia, Bishop Joshua Banda, the Chairman of the National HIV/AIDS TB/SI Council (NAC), and Ms Patience Sakuringwa, Executive Secretary of the Zambia Chamber of Small and Medium Business Associations.

**Kigali, Rwanda**

In Rwanda, the workshop took place at the Serena Hotel, Kigali on 21 October. The Director General of Centre National de la Lutte contre le SIDA (CNLS), Dr Anita Asimwe, opened proceedings with a speech on behalf of Rwanda’s Honourable Minister of Health, Dr Agnes Binagwaho. Also attending were Mr Faustin Mbandu, the Chairman of the Rwanda Private Sector Federation, Ms Omobolanle Babatunde, Head of CSR at Access Bank, Mr Jackie Karuranga of Access Bank Rwanda, and Mr Richard Kasese, the President of the Pan-African Business Coalition.

**Lagos, Nigeria**

Workshops were held in 4 locations at Victoria Island, Ikeja, Yaba and Apapa. At the opening ceremony in Victoria Island on 2 November, dignitaries included the First Lady of Lagos State, Mrs Abimbola Fashola, Mrs Bukky Holloway, CEO of Access Bank, Ms Omobolanle Babatunde, Head of CSR at Access Bank, and Dr Akudo Anyanwu Ikenwo, CEO/Founder Friends of the Global Fund Africa. Also present at the opening ceremony were Mr Effiong Enu, representative of the Director General of the National Agency for the Control of AIDS, Mr Olusina Olulana, Executive Secretary of the Nigerian Business Coalition against AIDS, and Lagos State Agency for the Control of AIDS.

**Accra, Ghana**

The workshop took place on 22 November at the Holiday Inn, Accra Airport. It was attended by Hon. Joseph Yileh Chereh, The Honourable Minister of Health, Dr Akram Ali Eltom, Director, Partnerships Unit (The Global Fund), Dr Richard Amenyen from Ghana AIDS Commission, Mr Yomi Akapo, Managing Director, Access Bank Plc Ghana, Dr Derek Anyee of the Ghana Business Coalition, Dr Constance Bart-Plange, National Malaria Control Programme, and Mr Austin Edoja-Peters, Head, Corporate Communications, Access Bank Plc.

**Tree planting – Going Green, Beyond Words**

The Bank is partnering with Idea Builders Initiative in support of a nationwide tree planting campaign called “Going Green, Beyond Words”. The aim is to inhibit global warming and protect the environment from deforestation and encroachment of deserts. The campaign commenced in 2009 and the Bank is now seeking to take this initiative across Nigeria and on into other parts of Africa, and to mobilise young people to take ownership of the programme. In 2011, the campaign focused on 2 states in Nigeria: Niger State in the north central geopolitical zone, and Sokoto State, a frontline state in the north west geopolitical zone. During the year under review, more than 2,000 trees were planted while over 1,600 students from 40 secondary schools were inspired to reduce CO₂ emissions in their schools, at home and throughout their local communities. Highlights of the programme include:
Left: Participant receiving certificate of participation from Julie M. Cege, Program Manager – Business Networks Development, GBCHealth Kenya

Right: Dr Olusina Olulana, CEO, Nigeria Business Coalition Against AIDS, Julie M. Cege, Program Manager – Business Networks Development, GBCHealth Kenya, Omobolanle Babatunde, Head, Sustainability, Access Bank (4th left); Mrs Bukky Holloway, representing First Lady of Lagos State, Mrs Abimbola Fashola; Dr Akudo Anyanwu Ikemba, CEO/Founder Friends Africa and participants at the SME Workplace Policy Programme Workshop Nigeria (from left to right)

Above: Breakout session during the SME Workplace Policy Programme Workshop in Nigeria

Left: Participants presenting the HIV/AIDS, TB and Malaria Workplace Policy developed by their respective Groups at the SME Workshop
Train the Trainers (TOT) Workshops
The TOT Workshops were held in mid 2011 and shared the objectives of Going Green, Beyond Words with over 80 representatives from partner schools. They in turn completed 6 briefing sessions for a highly enthusiastic audience of 1,600 students from each of the 40 partner schools.

Students focus group meeting and inauguration of the Green Club
The student focus group meeting provided a platform to educate students about the campaign’s aims, to increase their awareness of environmental sustainability, and to encourage schools to take ownership of the programme. The schools also established Green Clubs.

Programme launch
The initiative was formally launched in Minna, Niger State on Thursday, 30 June, 2011 and in Sokoto, Sokoto State, on Thursday, 7 July, 2011.

Niger state
The event was held at Day Secondary School B, Chanchaga, Minna, Niger State on 30 June, 2011 and was attended by over 200 people. The Niger State Executive Governor, represented by Dr Mammud Mohammad, Permanent Secretary, Ministry of Education, gave a keynote address. The speech was followed by remarks from key Niger State government officials including: Mrs Fati Abdullahi, Director of Educational Services; Dr (Mrs) H. N. Muhammad, Permanent Secretary, Ministry of Environment; Aliyu Muhammad, Director of Forestry; Alh. Balarabe Musa, the representative of the Permanent Secretary, Ministry of Youth Affairs and Strategy.

This was followed by presentation of tree planting tools to representatives of the 20 participating schools, with dignitaries planting trees at the school premises. The students of Day Secondary School B, Chanchaga, Minna – the host school – also performed a drama piece. The event concluded with a closing speech by the Principal of the School.

Sokoto state
The formal launch of the project in Sokoto State was attended by some 200 people including government officials, officials from participating schools, students and Access Bank staff. Opening remarks were read by Mustafa Aliyu, the Relationship Manager, Sokoto Branch of Access Bank. The Executive Governor of the state, who was out of the country, was represented by Alhaji Abubakar Mohammed Dan-Shehu Permanent Secretary, Ministry of Environment. Keynote addresses were delivered by Mr Adeniyi Adeleye of Idea Builders Initiative, and Dr Buhari Bello Kware, Permanent Secretary, Ministry of Science and Technology, Sokoto State.

After the speech and opening remarks, the following officials participated in the tree planting: the representative of the Governor, Alhaji Abubakar Mohammed Dan-Shehu; Dr Buhari Bello Kware, Permanent Secretary, Ministry of Science and Technology, Sokoto. Ahmad Bala Allu, Deputy Director, Senior Secondary, Representative of the Honourable Commissioner, Ministry of Education, Sokoto; Mustafa Aliyu, Relationship Manager, Access Bank; and the representative of the Sultan, Abubakar Maccido, from the Sultanate Council.

Other dignitaries at this event included: Salisu A. Shehu, Director of Forestry, Ministry of Environment; Nana S. Baura, Ministry of Science and Technology; Yakub Alhassan Abdul, CEO Senior Secondary, Ministry of Education; Ibrahim Idris, Assistant Director, Ministry of Science and Technology.

Employee volunteering
The Bank encourages employees to become actively involved in volunteering. Activities can involve supporting school programmes, coaching local youths, teaching financial education or serving on the board of a non-profit organisation. We believe that tapping into the passion and expertise of employees is one of the most important ways we can create positive change in the communities we serve. Employee volunteering significantly enhances the impact and social value of our investments.

We believe that tapping into the passion and expertise of employees is one of the most important ways we can create positive change in the communities we serve.

<td>Cervical Cancer Health Campaign</td>
<td>Group Treasury</td>
<td>Less privileged with particular focus on women</td>
<td>The programme entails cervical cancer publicity and awareness through e-mails, social media webpages (such as facebook and twitter), flyers, one on one interaction; and symposia on cervical cancer amongst others. The 2011 programme witnessed attendance of 350 participants that included representatives from more than 100 schools in Lagos State with not less than 5,000 students in their circle of influence and local government workers who have direct influence on host communities. In the course of the seminar, participants were well educated and encouraged to pass on the awareness on the deadly disease to others. Teachers who could not attend the seminars have the opportunity of visiting to the clinic for a free test and treatment. 335 women participated in the screening, 7 of these women tested positive to human papillomavirus (HPV). These women are currently undergoing free treatment at the George Kerry Life Foundation Clinic at Ikeja.</td>
<td>George Kerry Life Foundation</td>

Assurance Statement and Commentary

Assurance statement
Access Bank has commissioned Corporate Citizenship to provide external assurance and a commentary solely on its Corporate Social Responsibility Report 2011.

The scope of our assurance
The assurance provides the reader with an independent, external assessment of the report and, in particular, with how it corresponds with the AA1000 standard. It is intended for the general reader and for more specialist audiences who have a professional interest in Access Bank’s responsibility and sustainability performance.

Access Bank has chosen to use the iteration of the AA1000 assurance standard AA1000AS (2008). Our assurance is a Type 1 assurance as defined by the standard, in that it evaluates the nature and extent of adherence to the AA1000AS principles of inclusivity, materiality and responsiveness and assures the behaviour of the organisation as reported here. Our assurance used disclosed information as its starting point and then investigated the underlying systems, processes and sustainability performance information to arrive at its conclusions. Our assurance has been informed by the GRI G3 Principles for Defining Report Content and Quality.

The level of assurance offered is moderate as defined by AA1000AS (2008). That is to say, our work obtained sufficient evidence to support the statement that the risk of our conclusion being in error is reduced.

Access Bank is entirely and solely responsible for the contents of the report, Corporate Citizenship for its assurance.

A detailed note of our assurance methodology appears at the end of this statement.

Opinion and conclusions
In our opinion the Access Bank CSR Report reflects the principles of AA1000 (2008): inclusivity, materiality and responsiveness.

In our commentary we review the report against each of these principles separately. We also provide feedback that can help Access Bank and its stakeholders identify where reporting can be strengthened in future.

Commentary
This is Access Bank’s fourth full CSR Report. The Company has made important progress in its approach to CSR over the last four years. It is evident that CSR is a top priority for the Bank, and there is a strong commitment from senior management to drive the sustainability agenda forward, in line with international best practice. Access Bank has put in place a governance structure for managing CSR, and the work to further embed the CSR strategy across the organisation is on-going.

The report reflects both achievements and areas for improvement. Among its highlights, Access Bank initiated the Nigeria Sustainable Finance Week and the Strategic Sustainability Working Group. This, and other initiatives and engagement in external activities, shows the Bank’s important role in driving sustainability forward in the Nigerian banking sector. Access Bank recognises that in order to achieve long-term and sustainable change, an industry wide approach is crucial.

The report also touches upon challenges, in particular the findings from the employee survey, where a range of issues and concerns are described. We believe that it is crucial to provide a balanced picture of achievements and challenges, risks and opportunities, in a transparent way.

A major change from last year is the adoption of a new vision, mission and values for Access Bank. We believe that a discussion of the background and reason for this change, and its implications on the implementation for the CSR strategy would strengthen the report.

Access Bank continues prioritising community involvement. This year’s inclusion of community investment data, broken down in specific activities, gives the reader an understanding of the extent of the Bank’s community support.

It is evident that Access Bank wants to make progress on CSR, following global best practice. The Bank keeps on driving performance by building strategic partnership and adhering to a number of external initiatives and best practice standards, including UNPRI, LBG and the Equator Principles.

Our comments in relation to the three principles of AA1000 are as follows:

Inclusivity: Does the organisation accept a responsibility to those on whom it has an impact?
Does it involve Stakeholders in developing a strategic approach to corporate responsibility and sustainability?

In our view, the report displays Access Bank’s adherence to the AA1000 principle of inclusiveness.

Access Bank prioritises its responsibilities to its key Stakeholders. As in previous years, the bank has clearly structured the report around its Stakeholders, reporting on the impact it has on these groups.

The report clearly lists key stakeholders and provides examples on ways and mechanisms of engagement and main issues covered. As recommended in last year’s statement Access Bank should formalise the role of Stakeholder engagement in strategy development going forward, and we repeat the recommendation again. One way of doing this could be to engage a panel of relevant Stakeholders that could provide on-going and strategic input and advice on the CSR strategy moving forward.
While Nigeria remains the key market for Access Bank, it operates across ten countries. Last year’s statement recommended the Bank to include further details on its activities and operations in other markets, as it would give the reader a better sense of the banks activities, customers and the competitive landscape. Although the information on other markets has expanded this year, the majority of examples, facts and data included in the report continue to refer to Nigeria alone.

Materiality: What are the issues that really matter to the organisation’s sustainability performance (“material issues”)? How does the organisation identify these issues?

In our view, the report displays Access Bank’s adherence to the AA1000 principle of materiality. The report covers Access Bank’s core material issues in a clear way. The Bank defines materiality according to the GRI (G3) guidelines definition, and with reference to both internal and external factors. However, future reporting would benefit from including further detail on the process and methods applied for determining material issues. For example, a specific ‘Determining Materiality’ sub section or even a matrix could be included, to facilitate the reader’s understanding of the process.

Access Bank reports on its main environmental impact areas, notably energy use, fuel consumption, water, waste and transport. Last year’s statement recommended the Bank to expand reporting in this area, including further detail on environmental strategy, goals, and performance data. This year’s report has added a section on climate change, which is a good start towards improved reporting in this area.

Responsiveness: Does the organisation respond to stakeholder issues that affect performance through its actions and communications?

In our view, the report displays Access Bank’s adherence to the AA1000 principle of responsiveness. The report contains evidence that Access Bank uses feedback from stakeholder engagement to form its approach going forward. However, Access Bank could further highlight how new policies and practices are developed in response to stakeholder feedback. For example, what role did Stakeholders play in the development of the new mission, vision and values?

Access Bank is playing a significant role in driving sustainable banking in Nigeria forward through active involvement in various platforms and a range of external initiatives. For example, the Bank initiated the Nigeria Sustainable Finance week, which led to the signing of a Joint Commitment Statement on Nigeria Sustainable Banking Principles.

Looking forward

Access Bank has made considerable progress towards becoming a sustainable bank over the last few years. As the Bank moves to a forward-looking and long-term approach to sustainability, there is a need to set clearly defined targets, goals and KPIs. We believe that such approach would help the bank further drive performance and improvements. This is of particular importance as the recent merger with Intercontinental Bank will make Access Bank one of the top four leading financial institutions in Nigeria.
Methodological notes

The assurance work was commissioned in February 2012 and was completed on 30 March, 2012. Detailed records were kept of meetings, assurance visits and correspondence relating to the inclusivity, materiality and responsiveness of the report, as well as to technical matters relating to the accuracy and presentation of data. A team of four, led by an associate director, undertook the assurance and commentary process. A director acted as adviser to the group. The team has a variety of professional and technical competencies and experience. For further information please refer to our website www.corporate-citizenship.com.

Our external assurance and commentary process for Access Bank’s CSR report has involved, but not been limited to, the following elements:

- Understanding Access Bank and its value chain, its own culture and the broader social and environmental contexts in which it operates; its approach to and understanding of corporate responsibility; how it identifies issues material to its operations.
- Benchmarking against peers, competitors, best practice and internationally recognised standards to identify the basis on which to judge Access Bank’s performance.
- Analysis of Access Bank’s stakeholder engagement activity, including findings from the employee survey.
- Review of national and international published sources of information about the views and opinions of external stakeholders.
- Examination of the report at set stages in its development and testing of the assertions throughout, drawing from evidence and supporting documentation, reporting mechanisms, frameworks and processes.
- Examination of management and reporting systems, notably for community investment.
- Site visit to Access Bank’s head office in Lagos.
- Interviews with eleven senior managers including the Group Head of Corporate Social Responsibility, an Executive Director and the Customer Ombudsman.
- Attendance of a meeting/workshop on the Nigerian Sustainable Banking Principles in Lagos.

Our work did not extend to a complete audit of the report’s contents. We have not been responsible for the preparation of Access Bank’s CSR Report nor in devising the internal management and reporting systems that yielded the data contained therein.

The opinions expressed in this external assurance statement and commentary are intended to extend understanding of Access Bank’s non-financial performance and should not be used or relied upon to form any judgements, or take any decisions, of a financial nature.

Corporate Citizenship is a leading assuror of corporate responsibility reports. The company is a member of AccountAbility (Institute for Social and Ethical AccountAbility).

We have provided report assurance for Access Bank since 2009. In addition to our work on assurance, Access Bank is a member of the LBG (www.lbg-online.net), an evaluation framework for corporate community involvement which we manage on behalf of its members and adherents. We have done no other work for Access Bank during 2011.

Corporate Citizenship is part of Chime Communications.

This Report has been prepared in line with the Global Reporting Initiative (GRI) Sustainability Guidelines to GRI Application level B+. We have done this as a way of adding value to our CSR Report and the reporting process, while disclosing, and being accountable to, our internal and external Stakeholders on an ongoing basis.

Access Bank Plc welcomes feedback from all its Stakeholders in respect of the content of this report and any additional information.

We are interested in hearing what our Stakeholders think about our sustainability performance and reporting efforts and how we can improve both. Please email your thoughts and suggestions to:

Sustainability is the cornerstone of our business philosophy. Only by delivering social, economic and environmental value today, can we create Shareholder value for tomorrow.

As leaders in the Nigerian financial sector, we are uniquely positioned to further economic growth and development in Nigeria through our regulatory, lending and investment activities across a diversity of segments and sectors of the Nigerian economy. The context in which we make business decisions is, however, characterized by complex and growing challenges relating to population growth, urban migration, poverty, destruction of biodiversity and ecosystems, pressure on food sources, prices and security, lack of energy and infrastructure and potential climate change legislation from our trade partners, amongst others.

Increasingly, it has been demonstrated that the development imperative in Nigeria should not only be economically viable, but socially relevant and environmentally responsible. We recognize that we have a role and responsibility to deliver positive development impacts to society whilst protecting the communities and environments in which we operate. For today’s generation as well as for future generations. We believe that such an approach, one of sustainable banking, is consistent with our individual and collective business objectives, and can stimulate further economic growth and opportunity as well as enhance innovation and competitiveness.

Given the above considerations, we are prepared to take steps to ensure that our business decision-making activities take these considerations into account and are, where applicable, consistent with relevant international standards and practices, but with due regard for the Nigerian context and distinct development needs.

Consequently, we hereby state our commitment to developing and launching a voluntary set of Nigerian sustainable banking principles which will include:

1) An over-arching set of guidelines relating to our: (a) direct impact on communities and the environment as a result of our own business operations; and (b) indirect impacts on communities and the environment as a result of our lending and investment activities;

2) A set of sector-specific guidelines, including as a first priority: (a) oil and gas; (b) power (with a focus on renewable energy); (c) agriculture and related water resource issues;

3) A commitment to raising awareness and developing meaningful and lasting local capacity to manage emerging environmental and social risks and opportunities within our internal operations, as well as to relevant financial sector government agencies, learning institutions and service providers.

In developing these sustainable banking principles, we recognize the need for a process which involves the engagement of relevant stakeholders and industry experts. We also recognize the need for an approach which provides for appropriate levels of transparency, accountability and self-assessment through regular reporting to our stakeholders. We will seek to work with the Central Bank of Nigeria, other relevant government agencies and development finance institutions to create the enabling environment as well as the incentives and enforcement mechanisms required for successful adoption and uptake of the sustainable banking principles.

We acknowledge that we can better support environmentally and socially responsible economic development in Nigeria by joining forces rather than standing alone. We hereby sign this Joint Commitment Statement with the aim of developing a set of sustainable banking principles for the Nigerian banking sector, to drive long-term sustainable growth whilst focusing on development priorities, safeguarding the environment and our people, and delivering measurable benefits to society and the real economy.
Sustainable banking for a sustainable future
